Systematics Biology Of The Genus Macro:

Treatise on Zoology - Anatomy, Taxonomy, Biology. The Crustacea, Volume 4 Part B J.C. von Vaupel Klein, 2014-06-05
This part B of the fourth volume of The Crustacea contains chapters on Crustaceans in the Biosphere Crustaceans and Mankind Crustaceans in Art Orders Lophogastrida Stygiomysida and Mysida collectively known as Mysidacea As evident from the number 4B tagged to this volume vol 4 as originally planned had to be split into two fascicles 4A and 4B simply because of the numbers of pages covered by the various contributions meant for volume 4 The chapters in this book grew out of those in the French edition volumes 7 II and 7 III A Overall this constitutes the seventh tome published in this English series viz preceded by volumes 1 2004 2 2006 9A 2010 9B 2012 3 2012 and 4A 2013 Readers users should note that from vol 4A onward we have had to abandon publishing the chapters in the serial sequence as originally envisaged by the late Prof J Forest because the various contributions i e both the updates and the entirely new chapters have become available in a more or less random order Treatise on Zoology - Anatomy, Taxonomy, Biology. The Crustacea, Volume 5 Carel von Vaupel Klein, 2015-03-20 This fifth volume of The Crustacea contains chapters on Devoting a chapter to Pentastomida Class Eupentastomida Orders Bocheacea Mictacea and Spelaeogriphacea Order Amphipoda Order Tanaidacea For those working on Arthropoda it will be obvious that the chapters on Pentastomida are newly conceived The other chapters in this book constitute updated translations of contributions in the French edition of the Trait volume 7 III A while the order Bocheacea not featuring in the French version as only more recently described has been added in a combined treatment with the two closely similar orders Overall this constitutes the eighth tome published in this English series viz preceded by volumes 1 2004 2 2006 9A 2010 9B 2012 3 2012 4A 2013 and 4B 2014 From vol 4A onward the chapters are no longer published in the serial sequence as originally envisaged because the various contributions both the updates and the entirely new chapters become available in a more or less random order Yet when completing this series all major issues as well as all taxa currently recognized will have been treated Archaeogastropod Biology and the Systematics of the Genus Tricolia (Trochacea: Tricoliidae) in the Indo-West-Pacific Robert Robertson, 1985 Tricolia is placed in the monogeneric family Tricoliidae Woodring 1928 distinct from the Phasianellidae now another monogeneric family and the Turbinidae After a review of some aspects of archaeogastropod biology that are pertinent to systematics the nine Recent Indo West Pacific species of Tricolia are monographed systematically including ecology and geographical distributions The main taxonomic characters used are features of shell morphology colors and patterns the latter two are especially prone to vary and radulae Data on opercula jaws and a few other anatomical characters are also included Tricolia is from East Africa is described as a new species Tricolia variabilis is one of the most variable gastropod species known Sixteen of its characters are shown to vary geographically thirteen of them non concordantly Both the shells and radulae of T variabilis are sexually dimorphic
