System Theory in Geomorphology Kirsten von

Elverfeldt, 2012-03-12 Empirical research needs a profound theory to be successful This is the simple but in its consequences radical approach for this study in geomorphology It critically analyses the current system understanding and offers a new view for a geomorphology that understands systems as being open but at the same time operationally closed as self organized structure building and potentially self referential Kirsten von Elverfeldt succeeds in designing a theoretical framework that sets new standards within Physical Geography By using state of the art concepts in system theory it offers also new bridges to Human Geography as well as to other neighbouring disciplines This book was awarded the Dissertation prize 2010 of the German Working Group in Geomorphology of the DGfG and the Hans Bobek prize of the GG Austrian Geographical Society **Physical Geography: Earth Systems** John J.
