Non-University Higher Education in Europe James S. Taylor, José Brites Ferreira, Maria de Lourdes Machado, Rui Santiago, 2008-06-01 Today a substantial portion of higher education is provided outside of the traditional universities in non university institutions with a multitude of varied characteristics In recent decades higher education systems have been subjected to many changes and reforms throughout the world One of the most important was undoubtedly the expansion of higher education in the second half of the last century from an elite system to one for the masses While institutions of higher learning have been in existence for approximately 1 000 years this exponential growth has been much more recent This movement toward mass higher education has created substantial national impacts on the development of the systems of higher education While common denominators of change and adaptation can be identified globally there remain important differences from country to country There are many factors challenging higher education today and in the foreseeable future In one form or another these issues and trends can be seen in higher education systems throughout the world They include chronic underfunding marketisation and competition alternative providers massification

internationalisation governance leadership strategic management accountability accreditation and social relevance Another key factor for many countries especially in Europe and the focus of this book is the current and future status of the higher education systems that differentiate the university and non university sectors **Reclaiming Public Universities** Manisha Priyam,2022-04-25 This book explores the nature of public universities and higher education reforms in emerging economies with a focus on India South Africa and Brazil Drawing on context based case studies the essays in the volume highlight the state of public universities amongst the developing world with their shared colonial past and social caste and race inequalities Based on comparative and multidisciplinary studies the book provides a critical account of the policy reforms and changes on account of globalization and markets in higher education in public universities of the Global South regions The chapters also compare methodological approaches to university reform and restructuring of public universities and higher education systems in USA Australia the European Union and India and examine the California model the Bologna process the Melbourne model the University of Delhi reforms and engage critically with the New Public Management inspired reform policies The book further lays the groundwork for understanding massification in a contextual way and the possibilities for expansion of scale of mass higher education through public provision With its empirical findings and social theory analyses by global experts the volume will be of great interest to scholars and researchers of education higher education sociology and social anthropology development studies public policy and administration politics political economy and Global South studies It will also be useful to educationists policymakers and civil society organizations **Higher Education in Crisis** Samuel M. Natale,Anthony F. Libertella,Geoff Hayward,2001 This book s purpose is clearly realized In a balanced presentation the pressures for change the conflicts inherent in the university s yielding to the demands of society the curriculum changes with necessary adaptations of teaching style all are laid bare supported by an enormous amount of research While reverence is paid to the goals of a liberal arts education after a few chapters of setting the stage the ultimatum states to survive the corporate eclipse of the university a compromise must be reached with social demands that will leave intact the university s fundamental mission This book makes a fine contribution to the growing debate about the future of higher education by exploring the university s altering landscape the conflicts over its core values and legitimacy and the challenge for the university to negotiate the new landscape and to redefine itself within a larger educational context The methods chosen for this exploration involve the use of case studies as well as critical analysis of the paradigm shifts drawn from both the United States and the United Kingdom The cases are used to provide concrete examples of current issues Eventually the authors succeed in investigating the crisis confronted by the university as it tries to maintain a proper balance within an educational landscape that shifts between corporate realities and educational ideals **Routledge Library Editions: Education in Asia** Various,2021-07-14 This set of reissued books examines education in Asia from a variety of different angles From the westernisation of early twentieth century Chinese education to the impact of the Communist revolution to education and

society in Korea to Asian women s experiences of education this set collects some key texts by a range of original thinkers
