ABSTRACT

This study highlights Parallelism as a stylistic device in T. S. Elliot's poem "The Love Song of J. Alfred Prufrock (1915)". This study tries to show the importance of Parallelism in poetry and how it is dominated in the twentieth century. Specifically, it aims to explore the operationality of parallelism as a stylistic device in twentieth-century poetry, identifying the most dominant type of parallelism in twentieth-century poetry and showing how parallelism is useful as a stylistic device for the reader. The study results revealed that Parallelism is manifest, of great use in the interpretation of the poem. The twentieth-century poets in general and T. S. Elliot depend on parallelism in aestheticizing or beautifying their poems as it represents a set of regularities of form.

1. Introduction

Etymologically, the word 'poet' is derived from the word 'maker'. Hence, there is a close link between a carpenter or architect and a poet, as both of them are makers. Both of them work on symmetry in their compositions (Crawforth, 2013: 2).

Thus, writers generally utilize a wide range of linguistic and paralinguistic devices, including graphological, phonological, semantic, lexical and syntactic, to communicate textual meaning and enhance the artistic texture and flavor of their works. These devices make the ordinary extraordinary. Parallelism is one of these devices that is used to achieve balance or artistic equilibrium. It is defined as the occurrence of two identical structures in poems. It can be identified on the level of lexis, grammar, phonology, graphology, semantics and dialect (Scheindlin, 1974: 65).

To the best of the researcher's knowledge, this stylistic device, especially in twentieth-century poetry, has not thoroughly been dealt with. Therefore, the present study is carried out to shed light on the role of such a stylistic device in literary texts, especially in poetry. Hence, this study is an attempt to answer the following questions: How does parallelism have an operational role as a stylistic device in twentieth-century poetry? What is the most dominant type of parallelism in twentieth-century poetry? How can parallelism, as a stylistic device, be of benefit for the reader? In light of the above-mentioned problems, this study aims to explore the operationality of parallelism as a stylistic device in twentieth-century poetry and identify the most dominant type of parallelism in twentieth-century poetry. Showing the way parallelism is useful as a stylistic device for the reader.

1.1 Theoretical Background

1.1.1 Stylistics

Stylistics has been defined as a discipline of linguistics that is concerned with the systematic analysis of style in language and how this can vary according to such factors as, for example, genre, context, historical period and author. For instance, there is the individual style that distinguishes one writer from another, the styles associated with particular genres (e.g. 'newspaper language' or the gothic novel), or the characteristics of what might constitute a 'literary' style. In this sense, analyzing style means looking systematically at the formal features of a text, determining their functional significance for the interpretation of the text in question (Jeffries and McIntyre, 2010: 1).

Spurgeon, 2003 When J Henry Shorthouse 1834 1903 published John Inglesant in 1881 he contributed a unique synthesis of Anglo Catholic sensibilities to the enduring legacy of the Oxford Movement Although his philosophical romance has been acclaimed the greatest Anglo Catholic novel in English literature and the one English novel that speaks immediately to human intuition without regard to the reader s own faith or philosophy his most enduring contributions are the religion of John Inglesant an Anglo Catholic synthesis of obedience and freedom faith and

reason and the sacramental vision of the myth of Little Gidding Afflicted with a lifelong stammer the author of John Inglesant proved himself a master of cadenced rhythms and enspirited prose in quest of the great musical novel Delineating parallels between sixteenth century and Victorian England Shorthouse integrated Quietism with Platonism into a religious aesthetic a sacramental vision of the Divine Principle of the Platonic Christ Studied chronologically Shorthouse's transition from Quaker to Broad Church Sacramentalist provides informing comparison with T S Eliot's conversion from Unitarian to Anglo Catholic as his myth of Little Gidding informs the historical imagination of Eliot's Christian poetry and dramas The religious and developmental nature of the work of both artists affords analogies with C G Jung's psychology of Individuation
