The Taboo of Subjectivity B. Alan Wallace, 2000 For many scientists the only true religion is science itself Wallace examines scientists long term resistance to spiritual study of consciousness and calls for a new science of religion

The Taboo of Subjectivity B. Alan Wallace, 2004 This book takes a bold new look at ways of exploring the nature origins and potentials of consciousness within the context of science and religion Alan Wallace draws careful distinctions between four elements of the scientific tradition science itself scientific realism scientific materialism and scientism Arguing that the metaphysical doctrine of scientific materialism has taken on the role of ersatz religion for its adherents he traces its development from its Greek and Judeo Christian origins focusing on the interrelation between the Protestant Reformation and the Scientific Revolution Wallace argues that the metaphysical principles of scientific materialism have long impeded scientific research into subjective states of awareness including the nature of consciousness itself Drawing on the writings of William James Hilary Putnam Augustine and Indian Buddhist contemplatives such as Buddhaghosa Asanga and Padmasambhava he presents a theoretical framework and mode of inquiry into human consciousness that combines both extraspective and introspective methods of research He also looks at scientists long term resistance to the first hand study of consciousness detailing the ways in which subjectivity has been deemed taboo within the scientific community In tracing the impact of scientific materialism in modern scientific writing journalism and education Wallace shows that the empirical facts of scientific research are often fused with materialistic interpretations and argues that we must take greater care in distinguishing between the two In conclusion Wallace draws on William James s idea for a science of religion that would study the nature of religious and in particular contemplative experience In exploring the nature of consciousness this groundbreaking study will help to bridge the chasm between religious belief and scientific knowledge It is essential reading for philosophers and historians of science scholars of religion and anyone interested in the relationship between science and religion front and back flaps

The Cosmic Breath Amos Yong, 2012-05-10 Recent thinking in the interfaith dialogue and in the theology science dialogue have taken a pneumatological turn *The Cosmic Breath* explores this pneumatological theology as unfolded in the Christian Buddhist dialogue alongside critical interaction with the theology and science conversation As an attempt in comparative and constructive Christian philosophical theology its central thesis is that a pneumatological approach to Buddhist traditions in further dialogue with modern science generates new philosophical resources that invigorate Christian thinking about the natural world and humanity's place in it The result is a transformation of the Buddhist Christian dialogue from insights generated in the theology and science interface and a contribution to the religion and science dialogue from a comparative theological and philosophical perspective

Integral Spirituality Ken Wilber, 2007-11-13 This cutting edge theory of spirituality for today's global society honors the truths of modern science and postmodern culture while incorporating the wisdom of the great world religions Applying his highly acclaimed integral approach Ken Wilber formulates a theory of

spirituality that honors the truths of modernity and postmodernity including the revolutions in science and culture while incorporating the essential insights of the great religions He shows how spirituality today combines the enlightenment of the East which excels at cultivating higher states of consciousness with the enlightenment of the West which offers developmental and psychodynamic psychology Each contributes key components to a more integral spirituality On the basis of this integral framework a radically new role for the world's religions is proposed Because these religions have such a tremendous influence on the worldview of the majority of the earth's population they are in a privileged position to address some of the biggest conflicts we face By adopting a more integral view the great religions can act as facilitators of human development from magic to mythic to rational to pluralistic to integral and to a global society that honors and includes all the stations of life along the way
