Journeys of Life Nathan Carlin, Kate de Medeiros, 2024-07-18 Trained as a cultural historian Thomas R Cole is one of the most influential scholars of his generation with his work moving beyond and impacting many other fields and disciplines His work includes *The Journey of Life A Cultural History of Aging in America* which was nominated for a Pulitzer Prize Cole also published *No Color Is My Kind The Life of Eldrewey Stearns and the Integration of Houston* creating along with the book an accompanying film *The Strange Demise of Jim Crow* which was nominated for a regional Emmy and a National Humanities Medal Cole created a number of other films as well In all of his work there is an emphasis on religion spirituality and moral meaning Cole is also a Jewish spiritual director and this work has become a major focus for him in retirement This edited volume engages or responds to Cole's work which spans cultural history oral history aging studies film medical humanities religious studies and more As such this book is not about Cole per se but the impact of his ideas and subsequent inspirations

N+1 Issue 5 n+1, 2007-02 *Spider Webs* William Eberhard, 2020-12-22 In this lavishly illustrated first ever book on how spider webs are built function and evolved William Eberhard provides a comprehensive overview of spider functional morphology and behavior related to web building and of the surprising physical agility and mental abilities of orb weavers For instance one spider spins more than three precisely spaced morphologically complex spiral attachments per second for up to fifteen minutes at a time Spiders even adjust the mechanical properties of their famously strong silken lines to different parts of their webs and different environments and make dramatic modifications in orb designs to adapt to available spaces This extensive adaptive flexibility involving decisions influenced by up to sixteen different cues is unexpected in such small supposedly simple animals As Eberhard reveals the extraordinary diversity of webs includes ingenious solutions to gain access to prey in esoteric habitats from blazing hot and shifting sand dunes to capture ants to the surfaces of tropical lakes to capture water striders Some webs are nets that are cast onto prey while others form baskets into which the spider flicks prey Some aerial webs are tramways used by spiders searching for chemical cues from their prey below while others feature landing sites for flying insects and spiders where the spider then stalks its prey In some webs long trip lines are delicately sustained just above the ground by tiny rigid silk poles Stemming from the author's more than five decades observing spider webs this book will be the definitive reference for years to come
