Asia and Pacific Dept,2014-07-30 KEY ISSUES Context After three decades of remarkable growth the economy has been slowing Much of the slowdown has been structural reflecting the natural convergence process and waning dividends from past reforms weak global growth has also contributed Moreover since the global financial crisis growth has relied too much on investment and credit which is not sustainable and has created rising vulnerabilities Growth was 7.7 percent in 2013 and is expected to slow to around 7.2 percent this year and decline further over the medium term Focus The pattern of growth since the global financial crisis is not sustainable and has resulted in rising vulnerabilities The discussions focused on assessing the risks posed by the continued build up of vulnerabilities reforms to unleash new sustainable engines of growth and reduce vulnerabilities and how to best manage aggregate demand in this context as growth is slowing yet risks are still rising A key takeaway is that to secure a safer development path accommodative policies need to be carefully unwound accompanied by decisive implementation of the announced reform agenda to promote rebalancing The result will be somewhat slower but safer growth in the near term with the significant long run benefit of securing more inclusive environment friendly and sustainable growth Risks Credit and shadow banking local government finances and the corporate sector particularly real estate are the key and interlinked areas of rising vulnerability In the near term the risk of a hard landing is still considered low as the government has the capacity to combat potential shocks However without a change in the pattern of growth the hard landing risk continues to rise and is assessed to be medium likely over the medium term Reform agenda The authorities have announced a comprehensive and ambitious blueprint of reforms Successful implementation should achieve the desired transformation of the economy but will also be challenging Demand management Reining in credit growth local government borrowing and investment will address the risks but also slow growth Macro support should be calibrated to allow needed adjustments to take place while preventing growth from slowing too much Scenarios and spillovers With faster adjustment and reform implementation growth will be somewhat lower in the near term with moderate spillovers for trading partners However in the medium term income and consumption will both be higher a result that is good for China and good for the global economy
