Teacher To Teacher:

Teacher to Teacher Eleanor Ruth Duckworth, Experienced Teachers Group, 1997-01-01 This is an account of a year long project between the author and 13 teachers in which they learned from each other to become better teachers They dealt with issues concerning the day to day life of teaching including coping with difficult pupils and various success stories **And**

Sadly Teach Jurgen Herbst, 1989 To lend weight to his charge that the public school teacher has been betrayed and gravity to his indictment of the educational establishment for that betrayal Jurgen Herbst goes back to the beginnings of teacher education in America in the 1830s and traces its evolution up to the 1920s by which time the essential damage had been done Initially attempts were made to upgrade public school teaching to a genuine profession but that ideal was gradually abandoned In its stead with the advent of newly emerging graduate schools of education in the early decades of the twentieth century came the so called professionalization of public education At the expense of the training of elementary school teachers mostly women teacher educators shifted their attention to the turning out of educational specialists mostly men administrators faculty members at normal schools and teachers colleges adult education teachers and educational researchers Ultimately a history of the neglect of the American public school teacher And Sadly Teach ends with a plea and a message that ring loud and clear The plea that the current reform proposals for American teacher education the Carnegie and the Holmes reports be heeded The message that the key to successful school reform lies in educating teacher s true professionals and in acknowledging them as such in their classrooms A Guide for Tales from a Teacher's Heart Sally J. Toward a Framework of Resources for Learning to Teach Lauren Gatti, 2016-07-04 This book advances a new framework for learning to teach using in depth case studies to show how learning to teach in any type of program can best be understood as a recursive and dynamic process wherein teachers differentially access programmatic relational experiential disciplinary and dispositional resources In the last twenty years debates in the field of teacher preparation have increasingly become paralyzing and divisive as rhetoric around the failure of university teacher preparation intensifies The author addresses the historical and practical factors that animate these debates arguing that novice teachers and teacher educators must understand the central conflicts in the field however the book also advances a way of approaching learning to teach that accounts for but does not get stuck at the level of programmatic designation Using lively in depth case studies the author shows how novice urban English teachers from two different teacher preparation pathways a university based program and an urban teacher residency learn to teach within a policy context of high stakes testing and college readiness
