Teacher To Tycoon:

Teacher to Tycoon Erlinda Enriquez Panlilio, 2000 *From Teacher to Tycoon* Robert Codner, 1992 Poetry Writing Made Simple 1 Teacher's Toolbox Series Sarika Singh, 2015-05-11

Yes indeed everyone can be a poet Poetry is not the elusive and impractical exercise most of us think It is just a natural outlet of emotions thoughts experiences and more This unique book is akin to attending a teaching resource workshop where the teacher poet is enthusiastic to share his experience and learning about the inventive writing process and skills of poetry The straightforward and handy techniques used in this unpretentious book bring out the natural poet in all of us The volume offers tools practice and examples Dotted with exercises materials in this book are invaluable for classroom teaching Who says children cannot be trained to write poetry Sarika Singh's well structured undemanding encouraging and inspiring tutorial is like a series of stepping stones for all those who have imagined putting pen to paper to articulate a sentiment Goods teaching should demonstrate not inform or advise That principle in practise is what makes this volume extraordinary Poetry writing never seemed so simple *Let Them Eat Data* C. A. Bowers, 2000

Do computers foster cultural diversity Ecological sustainability In our age of high tech euphoria we seem content to leave tough questions like these to the experts That dangerous inclination is at the heart of this important examination of the commercial and educational trends that have left us so uncritically optimistic about global computing Contrary to the attitudes that have been marketed and taught to us says C A Bowers the fact is that computers operate on a set of Western cultural assumptions and a market economy that drives consumption Our indoctrination includes the view of global computing innovations as inevitable and on a par with social progress a perspective dismayingly suggestive of the mindset that engendered the vast cultural and ecological disruptions of the industrial revolution and world colonialism In *Let Them Eat Data* Bowers discusses important issues that have fallen into the gap between our perceptions and the realities of global computing including the misuse of the theory of evolution to justify and legitimate the global spread of computers and the ecological and cultural implications of unmooring knowledge from its local contexts as it is digitized commodified and packaged for global consumption He also suggests ways that educators can help us think more critically about technology *Let Them Eat Data* is essential reading if we are to begin democratizing technological decisions conserving true cultural diversity and intergenerational forms of knowledge and living within the limits and possibilities of the earth's natural systems
