The Collected Works of John Adolphus Etzler John Adolphus Etzler, 1977

Empire of Neglect Christopher Taylor, 2018-05-03 Following the publication of Adam Smith's *The Wealth of Nations* nineteenth century liberal economic thinkers insisted that a globally hegemonic Britain would profit only by abandoning the formal empire British West Indians across the divides of race and class understood that far from signaling an invitation to nationalist independence this liberal economic discourse inaugurated a policy of imperial neglect a way of ignoring the ties that obligated Britain to sustain the worlds of the empire's distant fellow subjects In *Empire of Neglect* Christopher Taylor examines this neglect's cultural and literary ramifications tracing how nineteenth century British West Indians reoriented their affective cultural and political worlds toward the Americas as a response to the liberalization of the British Empire Analyzing a wide array of sources from plantation correspondence political economy treatises and novels to newspapers socialist programs and memoirs Taylor shows how the Americas came to serve as a real and figurative site at which abandoned West Indians sought to imagine and invent postliberal forms of political subjecthood

The Great Delusion Steven Stoll, 2025-06-25 Endless economic growth rests on a belief in the limitless abundance of the natural world But when did people begin to believe that societies should even that they must expand in wealth indefinitely In *The Great Delusion* the historian and storyteller Steven Stoll weaves past and present together through the life of a strange and brooding nineteenth century German engineer and technological utopian named John Adolphus Etzler who pursued universal wealth from the inexhaustible forces of nature wind water and sunlight *The Great Delusion* neatly demonstrates that Etzler's fantasy has become our reality and that we continue to live by some of the same economic assumptions that he embraced Like Etzler we assume that the transfer of matter from environments into the economy is not bounded by any condition of those environments and that energy for powering our cars and iPods will always exist Like Etzler we think of growth as progress a turn in the meaning of that word that dates to the moment when a soaring productive capacity fused with older ideas about human destiny The result is economic growth as we know it not as measured by the gross domestic product but as the expectation that our society depends on continued physical expansion in order to survive

Technological Utopianism in American Culture Howard P. Segal, 2005-11-07 Featuring twenty five writers in all this book includes Howard P Segal's acclaimed work on utopian visionaries

The Religion of Technology David F. Noble, 2013-01-23 Arguing against the widely held belief that technology and religion are at war with each other David F Noble's groundbreaking book reveals the religious roots and spirit of Western technology It links the technological enthusiasms of the present day with the ancient and enduring Christian expectation of recovering humankind's lost divinity Covering a period of a thousand years Noble traces the evolution of the Western idea of technological development from the ninth century when the useful arts became connected to the concept of redemption up to the twentieth when humans began to exercise God like knowledge and powers Noble describes how technological advance accelerated at

the very point when it was invested with spiritual significance By examining the imaginings of monks explorers magi scientists Freemasons and engineers this historical account brings to light an other worldly inspiration behind the apparently worldly endeavors by which we habitually define Western civilization Thus we see that Isaac Newton devoted his lifetime to the interpretation of prophecy Joseph Priestley was the discoverer of oxygen and a founder of Unitarianism Freemasons were early advocates of industrialization and the fathers of the engineering profession Wernher von Braun saw spaceflight as a millenarian new beginning for humankind The narrative moves into our own time through the technological enterprises of the last half of the twentieth century nuclear weapons manned space exploration Artificial Intelligence and genetic engineering Here the book suggests that the convergence of technology and religion has outlived its usefulness that though it once contributed to human well being it has now become a threat to our survival Viewed at the dawn of the new millennium the technological means upon which we have come to rely for the preservation and enlargement of our lives betray an increasing impatience with life and a disdainful disregard for mortal needs David F Noble thus contends that we must collectively strive to disabuse ourselves of the inherited religion of technology and begin rigorously to re examine our enchantment with unregulated technological advance

The Collected Works of John Adolphus Etzler John Adolphus Etzler,1977 **Utopianism for a Dying Planet** Gregory Claeys,2024-12-10 How the utopian tradition offers answers to today s environmental crises In the face of Earth s environmental breakdown it is clear that technological innovation alone won t save our planet A more radical approach is required one that involves profound changes in individual and collective behavior Utopianism for a Dying Planet examines the ways the expansive history of utopian thought from its origins in ancient Sparta and ideas of the Golden Age through to today s thinkers can offer moral and imaginative guidance in the face of catastrophe The utopian tradition which has been critical of conspicuous consumption and luxurious indulgence might light a path to a society that emphasizes equality sociability and sustainability Gregory Claeys unfolds his argument through a wide ranging consideration of utopian literature social theory and intentional communities He defends a realist definition of utopia focusing on ideas of sociability and belonging as central to utopian narratives He surveys the development of these themes during the eighteenth and nineteenth centuries before examining twentieth and twenty first century debates about alternatives to consumerism Claeys contends that the current global warming limit of 1.5C 2.7F will result in cataclysm if there is no further reduction in the cap In response he offers a radical Green New Deal program which combines ideas from the theory of sociability with proposals to withdraw from fossil fuels and cease reliance on unsustainable commodities An urgent and comprehensive search for antidotes to our planet s destruction Utopianism for a Dying Planet asks for a revival of utopian ideas not as an escape from reality but as a powerful means of changing it
