The Coming Floods:

The "Peak Oil" Scare and the Coming Oil Flood Michael C. Lynch, 2016-07-25 Is the earth's oil supply starting to run out or is there far more oil than some experts believe This book points out flaws in the research used to warn of an oil shortfall and predicts that large new reserves of oil are soon to be tapped In the last decade oil experts geologists and policy makers alike have warned that a peak in oil production around the world was about to be reached and that global economic distress would result when this occurred But it didn't happen The Peak Oil Scare and the Coming Oil Flood refutes the recent claims that world oil production is nearing a peak and threatening economic disaster by analyzing the methods used by the theory's proponents Author Michael C Lynch former researcher at Massachusetts Institute of Technology MIT debunks the Peak Oil crisis prediction and describes how the next few years will instead see large amounts of new supply that will bring oil prices down and boost the global economy This book will be invaluable to those involved in the energy industry including among those fields that are competing with oil as well as financial institutions for which the price of oil is of critical importance Lynch uncovers the facts behind the misleading news stories and media coverage on oil production as well as the analytic process that reveals the truth about the global oil supply General readers will be dismayed to learn how governments have frequently been led astray by seeming logical theories that prove to have no sound basis and will come away with a healthy sense of skepticism about popular economics

The Coming Economic Flood Anthony Ho, 2014-12-02 By faith Noah being divinely warned of things not yet seen moved with godly fear and prepared an ark Hebrews 11:7 Are we living again in the days of Noah when another flood will suddenly burst upon the world with terrifying devastation Anthony Ho believes so This time however the flood will be economic God is soon going to judge the global economies writes Pastor Ho and the results will be as in Noah's day swift and catastrophic An engineer and scientist Pastor Ho uses a reasoned approach describing personal visions from God that he corroborates with scientific data and Bible prophecy to show why the collapse is imminent He will tell you how to prepare spiritually for the flood much like Noah did by building an ark And he will show you ways that we as Christians living amid the crisis can point people to their only hope Jesus

Tipping Point - the Coming Global Weather Crisis Michael Little, 2010-12-21 Tipping Point the Coming Weather Crisis is a forecast of a coming climate change that puts us in the beginning of a new ice age in just a few years A change that affects millions I go on to discuss how changes in climate have affected man in the past such as glaciers ice ages floods and volcanic eruptions I describe why these things happened and the mechanics behind them in words and graphics that are easy to understand Further discuss how man has been modifying the climate of the world for 10 000 years since we started using fire I talk of global warming and blame clean burning fuels and environmentalists for the current rise in temperature I cover how sea level changes created the Garden of Eden how this would be flooded and affected Noah and how volcanic eruptions are really the source of legends about fire breathing dragons I go on to discuss how climate change gave us the Garden of Eden and in the end took it away It

Congress. House,1941 [Changing Climate, Changing Worlds](#) Meredith Welch-Devine,Anne Sourdil,Brian J. Burke,2020-04-07 This book explores how individuals and communities

perceive and understand climate change using their observations of change in the world around them Because processes of climatic change operate at spatial and temporal scales that differ from those of everyday practice the phenomenon can be difficult to understand However flora and fauna which are important natural and cultural resources for human communities do respond to the pressures of environmental change Humans in turn observe and adapt to those responses even when they may not understand their causes Much of the discussion about human experiences of our changing climate centers on disasters and extreme events but we argue that a focus on the everyday on the microexperiences of change has the advantage of revealing how people see feel and make sense of climate change in their own lives The chapters of this book are drawn from Asia Europe Africa and South and North America They use ethnographic inquiry to understand local knowledge and perceptions of climate change and the social and ecological changes inextricably intertwined with it Together they illustrate the complex process of coming to know climate change show some of the many ways that climate change and our responses to it inflict violence and point to promising avenues for moving toward just and authentic collaborative responses
