

SEMANTICS

Semantics is the branch of linguistics that deals with studying meaning in language. It examines the meaning of words, phrases, sentences, and language.

OVERVIEW

Semantics looks at literal and implied meanings, the connotations words may carry, and how these meanings can change across different contexts. It also studies the relationships between words and phrases, like synonymy (words with the same or similar meanings), antonymy (words with opposite meanings), and polysemy (words or phrases with multiple, related meanings).

EXAMPLE

Interpreting Irony: Irony refers to when someone says one thing but means another, often conveying implied criticism or sarcasm. For example, if someone says, "What a great day!" while standing in pouring rain, this would be ironic because it implies disappointment with the current situation despite saying otherwise through their words.

G. Goodman, 1986-10-09 According to common misconception the Chinese political system is highly centralized One result of this widely accepted view is that China specialists have often neglected the study of decision making as a process Concentrating upon the neighbouring but contrasting provinces of Sichuan and Guizhou during the decade before the Cultural Revolution this book examines the interaction between centre and province and without adopting a centralist or a

pluralist viewpoint argues that a spatial dimension is of necessity part of the Chinese decision making process Particular attention is paid to the variability of this interaction over time **Catalogue of the East Asian Collection, East Asian Library, East Asian Language and Area Center, University of Rochester** University of Rochester. East Asian Library,1968 **External Research** ,1964 *Ideology and Organization in Communist China* Franz Schurmann,1973
