Jeanneret, Le Corbusier, 1971 *The City of Tomorrow and Its Planning* Arch. Press, 1978 The City of Tomorrow and Its Planning Le Corbusier, 1947 **The Blackwell City Reader** Gary Bridge, Sophie Watson, 2010-03-08 Updated to reflect the most current thinking on urban studies The Blackwell City Reader Second Edition features a comprehensive selection of multidisciplinary readings relating to the analysis and experience of global cities Includes new sections of materialities and mobilities to capture the most recent debates The most international reader of its kind including extensive coverage of urban issues in Asia China and India Combines theoretical approaches with a wide range of geographical case studies Organized to be used as a stand alone text or alongside Blackwell's A Companion to the City *Designing the City of Reason* Ali Madanipour, 2007-04-11 With a practical approach to theory Designing the City of Reason offers new perspectives on how differing belief systems and philosophical approaches impact on city design and development exploring how this has changed before during and after the impact of modernism in all its rationalism Looking at the connections between abstract ideas and material realities this book provides a social and historical account of ideas which have emerged out of the particular concerns and cultural contexts and which inform the ways we live By considering the changing foundations for belief and action and their impact on urban form it follows the history and development of city design in close conjunction with the growth of rationalist philosophy Building on these foundations it goes on to focus on the implications of this for urban development exploring how public infrastructures of meaning are constructed and articulated through the dimensions of time space meaning value and action With its wide ranging subject matter and distinctive blend of theory and practice this book furthers the scope and range of urban design by asking new questions about the cities we live in and the values and symbols which we assign to them **The City of To-morrow and Its Planning** Le Corbusier, 1971 This is a translation of the eighth edition of Urbanisme a landmark work in the development of modern city planning It was so recognized when it first appeared in English in 1929 A review in the Nation stated that Le Corbusier ranks with Freud Picasso and Einstein as a leading genius of our time The only great architect alive he has turned his attention from the individual house to town planning And the result is The City of Tomorrow a book not for the aesthetes but for statesmen At the same time Edgar Johnson wrote in the New York Evening Post that M Le Corbusier's extremely important book is an analysis of the problem of

the city and a solution It sidesteps none of the issues admits the inevitable growth in population the need for speed and centralization and provides a reasoned and thorough overcoming of the difficulties This book is both practically and artistically a work of vision The book was one of the first to recognize an approaching urban crisis and its main thesis is that such a vast and complicated machine as the modern great city can only be made to function adequately on the basis of strict order that we must aim first of all at efficiency but that it must lead us on to a fine and noble architecture Le Corbusier raises questions in this work that are still being raised today He concludes from his study that the whole urban scene is one of wasted opportunities and inefficiency He proposes an alternative course which is a bold and drastic reconstruction of the entire machine Le Corbusier presents in this work two schemes for the reconstruction of a modern city One is the Voisin plan for the center of Paris and the other is his more developed plans for the City of Three Million Inhabitants In both these schemes he adopts skyscrapers as his most important units but they are set at immense distances from one another and are surrounded by large open spaces or parks They are allocated to commercial not residential purpose the greater tenement houses and other buildings will remain relatively low in height The plans included in the book demonstrate clearly the scope and general appearance of the reconstruction that Corbusier proposes

The City James A.
