The Language Parallax Linguistic Relativism And Poetic Indeterminacy:

The Language Parallax Paul Friedrich, 2014-04-15 Humankind has always been fascinated and troubled by the way languages and dialects differ. Linguistically based differences in point of view have preoccupied many original minds of the past such as Kant and remain at the forefront of language study in philosophy, anthropology, literary criticism and other fields. Paul Friedrich's *The Language Parallax* argues persuasively that the locus and focus of differences among languages lies not so much in practical or rational aspects as in the complexity and richness of more poetic dimensions in the nuances of words or the style and voice of an author. This poetic reformulation of what has been called linguistic relativism is grounded in the author's theory of the imagination as a main source of poetic indeterminacy. The reformulation is also based on the intimate relation of the concentrated language of poetry to the potential or possibilities for poetry in ordinary conversation, dreams and other experiences. The author presents challenging thoughts on the order and system of language in their dynamic relation to indeterminacy and ultimately disorder and chaos. Drawing on his considerable fieldwork in anthropology and linguistics, Friedrich interweaves distinct and provocative elements: the poetry of language difference, the indeterminacy in dialects and poetic forms, the discovery of underlying orders, the workings of different languages, the strength of his own poetry. The result is an innovative and organic whole. *The Language Parallax* then is a highly original work with a single bold thesis. It draws on research and writing that has involved in particular English, Russian and the Tarascan language of Mexico as well as the personal and literary study of the respective cultures. Anthropologist, linguist and poet Friedrich synthesizes from his experience in order to interrelate language variation and structure, the creative individual ideas of system in process and questions of scientific and aesthetic truth. The result is a new view of language held to the light of its potentially creative nature.

A Reinterpretation of Linguistic Relativity Guohui Jiang, 2020-12-03 As a vital issue not only of linguistics but also of cognitive sciences, psychology, neurosciences, philosophy etc., engaging in the study of the relation between language, thought and reality, the doctrine of linguistic relativity (LR) went through upsurge, downturn, renaissance during more than 80 years yet remains still unsolved puzzle for researchers of all these academic areas. Numerous treatises with valued ideas about this issue are continuously contributed to this theme; nevertheless, the study of LR has been stagnant up to nowadays. The reason is that in my opinion, the study has deviated from the right direction and this deviation might be boiled down to three basic concepts. The expository scope of LR: LR cannot and should not concern with a human speech, thinking, action at the level of human biological/physiological traits, b) human behaviours in all fields of his everyday life and c) human spiritual activities in the areas of science, literature, philosophy, art etc. LR will explain that constrained by the language, ordinary people are not aware that the reality they talk, think about does not coincide with the outside world they physically experience. The relativity: We should ponder the language, thought, reality relation in line with the original intention of Whorf when he proposed the principle of LR, i.e. the relativity should not be interpreted as the discrepancy between customs, modes

of thinking and patterns of behavior of different linguistic communities on the basis of comparing peculiarities of their languages The language The doctrine of LR should concern with the human language as a complete and comprehensive system but not with a set of sporadically observed phenomena and certain random interpretation of them The linguistic intermediated world is eventually construed by the entire system of language rather than an assembly of peculiar language items

Rethinking Linguistic Relativity John J. Gumperz, Stephen C. Levinson, 1996-07-11 Linguistic relativity is the claim that culture through language affects the way in which we think and especially our classification of the experienced world This book reexamines ideas about linguistic relativity in the light of new evidence and changes in theoretical climate The editors have provided a substantial introduction that summarizes changes in thinking about the Sapir Whorf hypothesis in the light of developments in anthropology linguistics and cognitive science Introductions to each section will be of especial use to students

The Significance of Indeterminacy Robert H. Scott, Gregory S. Moss, 2018-07-20 While indeterminacy is a recurrent theme in philosophy less progress has been made in clarifying its significance for various philosophical and interdisciplinary contexts This collection brings together early career and well known philosophers including Graham Priest Trish Glazebrook Steven Crowell Robert Neville Todd May and William Desmond to explore indeterminacy in greater detail The volume is unique in that its essays demonstrate the positive significance of indeterminacy insofar as indeterminacy opens up new fields of discourse and illuminates neglected aspects of various concepts and phenomena The essays are organized thematically around indeterminacy's impact on various areas of philosophy including post Kantian idealism phenomenology ethics hermeneutics aesthetics and East Asian philosophy They also take an interdisciplinary approach by elaborating the conceptual connections between indeterminacy and literature music religion and science

Sounds Like Life Janis B. Nuckolls, 1996 Moreover the evidence from sound symbolism's grammatical patterning its performative foregrounding in multiple contexts of use and its ability to trigger memories of key life experiences suggests that for the Pastaza Quechua sound symbolism is more than a style of speaking It is a style of thinking about oneself as connected by the sounds that resonate through one's body with the natural world

The Creative Ethnographer's Notebook Melisa Cahnmann-Taylor, Kristina Jacobsen, 2024-10-28 The Creative Ethnographer's Notebook offers emerging and trained ethnographers exercises to spark creativity and increase the impact and beauty of ethnographic study With contributions by emerging scholars and leading creative ethnographers working in various social science fields e.g. anthropologists educators ethnomusicologists political scientists geographers and others this volume offers readers a variety of creative prompts that ethnographers have used in their own work and university classrooms to deepen their ethnographic and artistic practice The contributions foreground different approaches in creative practice broadening the tools of multimodal ethnography as one designs a study works with collaborators and landscapes and renders ethnographic findings through a variety of media Instructors will find dozens of creative prompts to use in a wide variety of classroom settings including early beginners to

experienced ethnographers and artists In the eBook version of this book there are numerous pop up definitions to key ethnographic terms links to creative ethnographic examples possibilities for extending prompts for more advanced anthropologists and helpful tips across all phases of inquiry projects This resource can be used by instructors of anthropology and other social sciences to teach students how to experiment with creative approaches as well as how to do better public and engaged anthropology Artists and arts faculty will also benefit from using this book to inspire culturally attuned art making that engages in research as well as research based art Readers will learn how creative ethnography draws on aspects of the literary visual sonic and or performing arts Information is provided about how scholars and artists or scholarartists document culture in ways that serve more diverse public and academic audiences *Dramatized Discourse* Zhuo Jing-Schmidt,2005-08-31 Language is a symbolic system of meanings evoked by linguistic forms The choice of forms in communication is non arbitrary Rather speakers pick those forms whose meanings best convey their discourse intention The meaning of the Mandarin ba construction argues Jing Schmidt is discourse dramaticity a concept that includes high conceptual salience and subjectivity The ba construction and its syntactic variations are never interchangeable because contrast in their meanings determines difference in their functions Quantitative analyses based on authentic data validate the postulation of discourse dramaticity By taking discourse pragmatics seriously the dramaticity hypothesis enables a unitary explanation that transcends sentence grammar The diachronic treatment reveals the syntactic change of the ba construction as an adaptive process of pragmatization which raises the issue of linguistic evolution as a result of socio cultural development This book will be of particular value to readers interested in the interaction between grammar and pragmatics and to teachers confronting the controversy of the ba construction in foreign language pedagogy *Cognitive Modeling in Linguistics* Vladimir Polyakov,Valery Solovyev,2012-01-17 Created as intercultural and interdisciplinary conferences of the series Cognitive Modeling in Linguistics have been successfully held since 1998 Over the years CML has visited a number of countries attracting more and more scientists from all over the world and thus broadening the scope of its topics The conference has worked out its scientific character and now it has a constant core of participants and the term cognitive modeling has become a popular topic of high profile conferences in linguistics and artificial intelligence which affirms the CML s direction of movement The present volume gathers the most outstanding and interesting articles from participants of the XIIIth International Conference Cognitive Modeling in Linguistics whose studies will no doubt be of interest to both scientists who have tied their lives with linguistics as well as to those people who treat it as a hobby For information about CML conferences please visit www.cml.msis.ru **Cultural Memory of Language** Susan Samata,2014-11-20 I can t even speak my own language were the words overheard in a college staffroom that triggered the writing of this book Calling something my own implies a personal proprietary relationship with it But how can it be your own if you cannot speak it The Cultural Memory of Language looks at unintended monolingualism a lack of language fluency in a migratory cultural

situation where two or more languages exist at home It explores family history and childhood language acquisition and attrition What is the present everyday experience of language use and life between two cultures Examining interview data Samata uncovers a sense of inauthenticity felt by people who do not fully share a parent s first language Alongside this features a sense of concurrent anger and a need to assign blame Participation in the language even to the extent of phatic or formulaic phraseology occasions feelings of authentic linguistic and cultural inclusion The book thus uncovers appreciable and measurable benefits in positive self image and a sense of well being Looking at how people view language is essential how they view the language they call their own is even more important and this book does just that in a qualified applied linguistic environment American Anthropology, 1971-1995 Regna Darnell, 2002-01-01 American anthropology in the late twentieth century interrogated and depicted the worlds of others past and present in subtle and incisive ways while increasingly questioning its own authority to do so Marxist symbolic and structuralist thought shaped the fieldwork and conclusions of many researchers around the globe Practicing anthropology blossomed and grew rapidly as a subdiscipline in its own right There emerged a keener appreciation of both the history of the discipline and the histories of those studied Archaeologists witnessed a resurgence of interest in the concept of culture The American Anthropologist also made systematic efforts to represent the field as a whole with biological anthropology and linguistics particularly adept at crossing subdiscipline boundaries Proliferation of specialized areas within sociocultural anthropology encouraged work across the subdisciplines The thirty selections in this volume reflect the notable trends and accomplishments in American anthropology during the closing decades of the millennium An introduction by Regna Darnell offers a historical background and critical context that enable readers to better understand the changes and continuity in American anthropology during this time
