Immigration Avner De-Shalit, 2018 All over the world immigration is one of the most urgent political issues creating tensions and unrest as well as questions of justice and fairness Academics as well as politicians have been relating to the question of how states should cope with immigrants but 96% of immigrants end up in cities and in Europe and the USA two thirds of the immigrants settle in seven or eight cities Indeed most of us encounter with immigrants as city zens in our everyday life rather than as citizens of states So how should cities integrate immigrants Should cities be allowed to design their autonomous integration policies Could they issue visas and permits to immigrants Should immigrants be granted voting rights in local elections before naturalization And how do cities think about these issues What can we learn from cities which are thought to be successful in integrating and assimilating immigrants Is there a model of integration within the city which is best The book discusses these questions both empirically and normatively The book is based on hundreds of in depth discussions of these matters with city dwellers in San Francisco New York London Amsterdam Berlin Thessaloniki and Jerusalem It shifts the discourse on immigration from thinking like a state to thinking like a city [The Cities of Song China](#) I Bao Weimin, 2025-06-25 This first volume of a two volume set on Song Dynasty cities examines the innovative urban institutions and management practices that emerged during this period The book compares the urban landscape and administrative system in the Song Dynasty with those of the Tang Dynasty It challenges the conventional view that the transition from Tang to Song marked a shift from an enclosed ward system to a relatively open compartmentalized system Instead it argues for a significant transformation of the ward system rather than its complete disappearance The study examines the establishment of urban firefighting systems based on the concept of the Corner and analyzes the flourishing of urban markets under various forms of control and restriction It also discusses the challenges posed by the emergence of a liberal commodity economy within traditional Chinese society This volume will be essential reading for scholars and students of Chinese history and urban studies as well as urban planners historians and policy makers interested in understanding historical approaches to urban development and management **The Oxford Handbook of Environmental and Conservation Psychology** Susan D.
