

Power without accountability

The City Power Without Accountability Power Without Accountability

Bob Jessop, Henk Overbeek

The City Power Without Accountability Power Without Accountability:

Power Without Responsibility James Curran, Jean Seaton, 2009-09-10 Power Without Responsibility is a classic introduction to the history sociology theory and politics of the media in Britain Hailed by the Times Higher as the seminal media text and translated into Arabic Chinese and other foreign languages it is an essential guide for media students and critical media consumers alike The new edition has been substantially revised to bring it right up to date with developments in the media industry new media technologies and changes in the political and academic debates surrounding the media In this new edition the authors consider the impact of the internet the failure of interactive TV media and Britishness new media and global understanding journalism in crisis BBC and broadcasting at the beginning of the twenty first century Assessing the media at a time of profound change the authors set out the democratic choices for media reform **Responsibility** James Curran, Jean Seaton, 2003-12-16 Widely regarded as the standard book on the British Media this authoritative introduction to the history sociology theory and politics of media and communications studies has been substantially revised and updated to bring it up to date with developments in the media industry. Its three new chapters describe the battle for the soul of the internet the impact of the internet on society and the rise of new media in Britain In addition it examines the recuperation of the BBC how international and European regulation is changing the British media and why Britain has the least trusted press in Europe Sharing the City John Abbott, 2013-11-05 While the rate of urbanisation in the developing world has increased dramatically over the past 20 years governments capacity to support urban growth has in many cases failed to keep up with this trend Non governmental organisations working in the field have long advocated community management of the urban environment as the best solution to this problem and there is now a growing consensus that the answer does indeed lie with local communities Yet there is still little understanding of what constitutes meaningful and effective community participation or how it may be achieved in such a complex operating environment Sharing the City gives a comprehensive account of urban community participation both in theory and practice It first presents a wide ranging analysis of the issues and develops a participatory framework for urban management Using case studies and existing examples from around the world and drawing on lessons learned from previous experience it then develops the theory into a practical working model Effective participatory urban management calls for a fundamental rethink on the part of all the actors involved from local authorities and development agencies through local and international NGOs to the community based organisations and the communities themselves In redefining their roles and relationships Sharing the City presents a new and radically different yet viable and effective approach to the concept of urban management

Shareholders and Stakeholders Joanne F Sonin, 2023-09-07 This book explores the evolution of the shareholder in post war Britain within the context of changing legal political economic and social conditions It examines how the post war transformation of the shareholder body influenced relationships amongst stakeholders impacting corporate behaviour and

the legal and political efforts to govern industry and financial markets The book addresses a number of themes including 1 how the movements for democratisation influenced the treatment of shareholder interests and the calls for stakeholder representation 2 how the rhetoric of change created a narrative that deflected from the lack of systemic legal reforms and protected the status quo 3 how in the post war consensus environment political positions on equity ownership de radicalised which proved unsustainable against a background of increasing political polarisation and industrial unrest and 4 how the institutionalisation of the post war shareholder body had profound effects on industry the financial markets and the economy With these themes as a foundation the evolutionary arch of the post war shareholder is examined focusing on developments that influenced the treatment and perception of shareholder and stakeholder interests including nationalisations shareholder democracy corporate purpose and industrial democracy The book further considers how these post war changes contribute to the post 1979 legal treatment of shareholder and stakeholder interests including subsequent changes to the Companies Act and the development of corporate governance codes Parallels to contemporary movements for stakeholder capitalism corporate purpose and ESG are drawn The historical analysis of the post war shareholder provides a framework for considering current questions on shareholder primacy and the demands for systemic legal reforms These missed opportunities for meaningful changes to the treatment of shareholder interests in UK company law serve as useful precedents for evaluating subsequent periods Capital City Hamish McRae, Frances Cairncross, 2017-11-28 Originally published in 1985 Capital City London as a Financial Centre proves in depth analytical description of the financial institutions of the City of London The book describes in detail the operations of the banks the stock market the insurance world and other bodies that make up the world's largest international financial centre. The book also answers a series of questions on the City s performance accountability and honesty and explains how the City reached its present position discuss its future The London Stock Exchange Ranald Michie, 2001-04-26 In 2001 the London Stock Exchange will be 200 years old though its origins go back a century before that This book traces the history of the London Stock Exchange from its beginnings around 1700 to the present day chronicling the challenges and opportunities it has faced avoided or exploited over the years Throughout the history seeks to blend an understanding of the London Stock Exchange as an institution with that of the securities market of which it was and is such an important component One cannot be examined satisfactorily without the other Without a knowledge of both for example the causes of the Big Bang of 1986 would forever remain a mystery However the history of the London Stock Exchange is not just worthy of study for what it reveals about the interaction between institution and market Such was the importance of the London Stock Exchange that its rise to world dominance before 1914 its decline thereafter and its renaissance from the mid 1980s explain a great deal about Britain s own economic performance and the working of the international economy For the first time a British economic institution of foremost importance is studied throughout its entire history with regard to the roles played and the constraints under which it operated and the

results evaluated against the background of world economic progress **Dynasties** David S. Landes, 2007-09-25 From the author of the New York Times bestseller The Wealth and Poverty of Nations a fascinating look at the crossroads of kin and coin David S Landes has earned a reputation as a brilliant writer and iconoclast among economic historians In his latest acclaimed work he takes a revealing look at the quality that distinguishes a third of today's Fortune 500 companies family ownership From the banking fortunes of Rothschild and Morgan to the automobile empires of Ford and Toyota Landes explores thirteen different dynasties revealing what lay behind their successes and how extravagance bad behavior and poor enterprise brought some of them to their knees A colorful history that is full of surprising conclusions Dynasties is an engrossing mix of ambition eccentricity and wealth A History of the Office and Office Work Rob Harris, 2025-04-08 This book brings together the office and office working as an economic construct as a business function as a building type and as a mode of work It explores social and economic relations and it traces the evolution of work and the environment and equipment needed to support it over the last 400 years In so doing it helps to fill a void in popular understanding of the office The role of the office has been examined over the past three years in ways that it has never been examined before Whilst the existential crisis arising from COVID 19 has settled somewhat there remain big questions over the future of office workers and office real estate This book is a timely well researched and fascinating contribution to the debate Rob Harris explores how the nature of work has changed and continues to change placing the events surrounding COVID 19 into a longer term perspective and asking what is the future of the office Will it go through a radical reinvention How will office work evolve in the future Whither office buildings The book emphasises the continuum of change and that today s events are simply the latest stage of change rather than something entirely novel This book will be of interest to anyone with a stake in the built environment whether as an investor occupier owner manager or advisor It is equally accessible to those with a non technical background including students on courses such as economic history economics geography real estate and urban planning

Schroders Richard Roberts, 2016-07-27 J Henry Schroder Wagg Co has been a leading merchant bank of the City of London for more than a century This book tells its history from its founding in 1818 by John Henry Schroder a Hamburg merchant through difficult times in the international slump of the early 1930s to its rise to one of the largest and most prestigious of city firms in London today Playing the Market Kieran Heinemann, 2021-06-22 Nowhere in Europe are people more likely to enjoy a regular flutter in stocks and shares than in Britain Whether we consider the millions of online stockbroking accounts or the billions spent on spread betting it is a national pastime in today s Britain to play the markets How did this distinctively British obsession with investment and speculation come about Playing the Market tells this story by exploring the history of financial capitalism in Britain during the twentieth century from below It explains how and why everyday British people increasingly invested speculated and gambled in stocks and shares from the outbreak of World War I over the postwar decades and the Thatcher years up until the premiership of Tony Blair The study accounts for a momentous

shift in attitudes towards stock market investment that occurred throughout the twentieth century In the interwar period traditional moral and cultural constraints about the stock market which were still powerful in the Victorian period gradually began to collapse in public and private life In the following decades financial securities lost their stigma of being either immoral or suitable only for the upper classes Promising higher than average returns and a similar thrill of risk and reward as gambling in horses or the football pools the stock market became a popular pastime for millions of Britons even in the postwar decades when Britain had nationalized industries and politicians of both parties indulged in staunchly anti finance rhetoric With the expansion of popular investment after both world wars Britain developed a stock market culture that was unique across Europe and gave rise to a market populist sentiment that eventually proved fertile soil for the arrival of Thatcherism The Cambridge Economic History of Europe H. J. Habakkuk, Michael Moissey Postan, 1965 Kingston Butcher 2: Shadows in the Mist Kenneth Moulton, 2024-12-07 The Kingston Butcher is back but this time the shadows are darker and the stakes are higher In 1973 the peace of Kingston is shattered once again as a chilling new series of murders grips the city in fear When a body is discovered in the park grotesquely posed and marked with the word Repent it becomes clear that someone is following in the Kingston Butcher's bloody footsteps or perhaps reviving his legacy with even greater malice Journalist Claire Thompson thought the horrors of the past were behind her but the new killer's brutal handiwork pulls her back into a nightmare she knows all too well Partnering with Detective Ryan Lang Claire dives headfirst into the chaos uncovering the dark secrets that tie Kingston's elite to the horrors of the past As the body count rises it becomes a race against time to understand the killer's twisted motives and to prevent Kingston from falling into complete darkness In Shadows in the Mist follow Claire and Lang as they navigate a city haunted by its own sins where every secret has a cost and the past is never truly buried This spine chilling thriller will leave you questioning what evil lurks just beneath the surface and who might be hiding in the fog **National Capitalisms, Global Competition, and Economic** Performance Sigrid Quack, Glenn Morgan, Richard Whitley, 2000 Why are some firms successful on global markets whilst others are not In this collection of papers a group of distinguished international researchers examine the inter relationship between national context firm performance and global competitiveness In a series of empirical studies covering major industries such as banking telecommunications construction automobiles and airlines in a number of European countries Great Britain France Germany Holland Finland Slovenia the studies show how distinctive patterns of firm competences and capabilities arise from national contexts These influence the way in which firms perform in response to changing technologies and competitive pressures Thus the impact of the globalisation of economic activity may be to reinforce existing national differences in firm performance rather than producing a homogenisation and standardisation This book will be of interest to researchers in business and management sociology economics and political science for its comparative organizational approach to problems of economic performance **Transnational Capital and Class Fractions** Bob

Jessop, Henk Overbeek, 2018-08-14 Emerging in the late 1970s the Amsterdam School s AS most distinctive contribution to international political economy was the systematic incorporation of the Marxian concept of capital fractions into the study of international politics Contending that politics in advanced capitalist countries takes place in a fundamentally transnationalized space in which the distinction between domestic and international has blurred it shows how in this space politics is structured by competing comprehensive concepts of control Presenting a concise and instructive introduction to the origins development and significance of this distinct approach this book provides a unique overview of the School s contemporary significance for the field Offering a new generation of critical scholars the opportunity to become acquainted at first hand with some of the contributions that have shaped the work of the AS the contributions present critical commentaries discussing the merits and shortcomings of the AS from a variety of perspectives and undertake a self critical evaluation of the current place and value of the AS framework in the broader landscape of approaches to the study of contemporary capitalism Written for scholars and students alike it will be of interest to those working in international political economy international relations and political science political sociology European studies and branches of academic economics such as regulation theory and institutional economics The Re-Emergence of Global Finance G. Burn, 2006-04-19 Gary Burn examines how in 1950s London City bankers invented a new form of money and escaped offshore beyond the jurisdiction of monetary authority This is the story of the Eurodollar and the re emergence of global capital It tells how the City discarded sterling and reclaimed its historic role as the world's foremost financial centre Regulating Mergers and Acquisitions of U.S. Electric Utilities: Industry Concentration and Corporate Complication Scott Hempling, 2020-10-30 What happens when electric utility monopolies pursue their acquisition interests undisciplined by competition and insufficiently disciplined by the regulators responsible for replicating competition Since the mid 1980s mergers and acquisitions of U S electric utilities have halved the number of local independent utilities Mostly debt financed these transactions have converted retiree suitable investments into subsidiaries of geographically scattered conglomerates Written by one of the U S s leading regulatory thinkers this book combines legal accounting economic and financial analysis of the 30 year march of U S electricity mergers with insights from the dynamic field of behavioral economics City of Detroit v. Detroit Police Officers Association, 408 MICH 410 (1980) ,1980 63929 Virtue and Law in Plato and **Beyond** Julia Annas, 2017-10-06 Julia Annas presents a study of Plato's account of the relation of virtue to law how it developed from the Republic to the Laws and how his ideas were taken up by Cicero and by Philo of Alexandria Annas shows that rather than rejecting the approach to an ideal society in the Republic as generally thought Plato is in both dialogues concerned with the relation of virtue to law and obedience to law and presents in the Laws a more careful and sophisticated account of that relation His approach in the Laws differs from his earlier one because he now tries to build from the political cultures of actual societies and their histories instead of producing a theoretical thought experiment Plato develops an

original project in which obedience to law is linked with education to promote understanding of the laws and of the virtues which obedience to them promote Annas also explores how this project appeals independently to the very different later writers Cicero and Philo of Alexandria Thin Power Andy Marshall, 2016-07-18 Thin Power is the unauthorized biography of former mayor of Calgary Rod Sykes featuring the achievements and bitter controversies of his eight year term ending in 1977 Publicly revealed for the first time are details of Sykes unorthodox upbringing in Victoria B C his rise to the mayoralty and his doomed attempt at provincial politics as leader of the Alberta Social Credit Party in the early 1980s It offers an entertaining look into a fascinating era of growth and change in the history of Calgary and Alberta and takes the reader up close to the successes and failures of one of the nation s most divisive politicians Sykes friendship with prominent former leaders including Prime Minister Pierre Trudeau and Alberta Premier Ernest Manning are explored in detail His fractious relationship with Alberta Premier Peter Lougheed and his strange connection to British royalty are also examined The gall and the guts of this stick thin politician in a grey suit will amaze modern readers just as it did those who watched as he single handedly transformed Calgary s political landscape Security and Climate Change Mark Lacy, 2012-09-10 This new book explains why the international community has responded with a sense of fatalistic passivity to climate change It presents a distinct critique of realism through the study of this topic commonly overlooked in international relations The author argues that the realist view rests on a dangerous contradiction far from delivering security it serves to limit the way we think about the new generation of risks we face The book also provides a detailed case study evaluating US climate politics under the Clinton and Bush administrations
