Policy examines the extent to which specific norms and socialization processes within the political and civic culture abet corruption or the proclivity to engage in corrupt practices and how they help reinforce political attitudes and civic norms that have the potential to undermine the effectiveness of government. It also delineates specific doctrinal models and strategic framework essential to the development and implementation of Nigeria's national security policy as well as innovative approaches to national development planning. Professor Kalu N. Kalu offers an exhaustive study that integrates several quantitative models in addressing a series of theoretical and empirical questions that inform historical and contemporary issues of the Nigerian project. The general premise is that it is not enough to simply highlight the problems of the state and address the what question; we must also address the why and how questions that drive political change, policy preferences, and competing political outcomes.

The SAGE Handbook of Comparative Politics Todd Landman, Neil Robinson, 2009-06-16

Changing Values, Persisting Cultures Thorleif Pettersson, Yilmaz Esmer, 2008-03-15

In 1981 the European and World Values surveys started the empirical investigation of cultural values on a global scale. This volume builds upon the findings of these surveys and analyzes value change in a number of key countries around the globe. The authors track value change and stability in their respective countries during the last decade, the last two decades where data are available of the 20th century. All authors have been actively involved in value surveys and have a great deal of expertise in countries that they write on. Thus the volume is a valuable complement to studies that deal with the topic from a global perspective without providing any detail about individual societies. The countries covered are Argentina, Austria, Canada, Denmark, France, Germany, Mexico, the Netherlands, South Africa, South Korea, Spain, Sweden, Turkey, and the United States.

Patterns of Social Capital Gene A. Brucker, 2001

Societies work best where citizens trust their fellow citizens, work cooperatively for common goals, and thus share a civic culture. The accumulation of reciprocal trust, as demonstrated by voluntary efforts to create common goods, builds social capital and contributes to effective government. This volume advances the study of social capital across chronological and geographical space. It examines voluntary associations comparatively and cross-culturally as indicators of citizen readiness for civic engagement. This book is ultimately about the pattern of social and civic interactions in past times and how these patterns may no longer exist.

Theorising Social Change in Post-Soviet Countries Balihar Sanghera, Sarah Amsler, Tatiana Yarkova, 2007

The book traces three main approaches to the sociology of post-Soviet societies: studies guided by neoliberal theory and/or practice work which may be termed neoconservative in orientation and which is often a response to the first; and a third type of work that is considered both critical and reflexive and which seeks to transcend the limitations

of the other approaches The book is divided into three parts addressing polity culture and economy In each section authors endeavour to transcend both neoliberalism and neoconservatism and reach for a third approach critical social science This is a broad movement and the authors vary in their own explanatory and normative ideas as they carve out frameworks that will enable them to develop a more rigorous and at the same time more comprehensive and critical understanding of social change
