The Clandestine Philanthropist:

The Clandestine Philanthropist Wayne Lemmond, 2004-04-30 Meet Duncan Creiss Young ruggedly handsome wealthy and powerful and a man with a past and present shrouded in mystery Ten years ago he made a purchase that changed his life forever and gave him more wealth than he ever thought existed And with that wealth came responsibility and difficulty such as he never dreamed One fateful evening he decides to form a foundation to help those in need But because of his yearning for a working class lifestyle the CEO of his financial empire advises him that his role in this noble endeavor must remain clandestine in nature And so the Fair Shake Foundation is formed It is an organization that like its founder is cloaked in mystery and intrigue Join Duncan Creiss as he covertly seeks to make the lives of those who surround him better As he progresses in his philanthropic quest he discovers that the attempt is not as easy as he first imagined Along the way he will discover a fine line between what he defines as helping people and what others define as interference The deceit treachery violence and betrayal he experiences is like nothing he thought possible These elements combined threaten to destroy not only him but also his relationship with Mariko the woman he loves The Universalist's Miscellany, Or, Philanthropist's Museum, 1800

Philanthropists and Foundation Globalization Joseph Kiger, 2017-07-28 The modern American foundation as an instrumentality for charitable and philanthropic giving is in many ways a unique and complex social economic political institution This is particularly the case for foundations with large assets As a social phenomenon the foundation has deep roots in the past At the beginnings of any degree of civilization charitable giving and rudimentary forms of foundations

emerge This is the case in many regions of the world The pattern is consistent once enough property or wealth beyond primitive human needs is accumulated some of it begins to be set aside for what the donors of such wealth consider worthwhile purposes The serious literature contributing greatly to public perception of philanthropy and foundations has been relatively sparse Much of what is available is quantitative and statistical in nature There has been limited objective attention to the motives or reasons spurring individual philanthropists to engage or not to engage in creating foundations such motivation needs historical and comparative analysis Major investigations and studies of foundations together with ancillary national regional and international organizations to facilitate such study have received spotty consideration Philanthropists and Foundation Globalization addresses three interrelated aspects of foundation history First it reviews biographical historical profiles of the founding philanthropists and their heirs engaged in international giving Second it discusses major governmental and non governmental investigations and studies of foundations including domestic ones and also foreign ones in which U S participants have played a prominent role spanning the period 1912 to the present Third it chronicles foundation developments and activities in Europe at the close of the twentieth century The volume provides a historical account of some U S foundations international activity in a particular region in a specific time period and their a

Beyond Empiricism expands the discourse on theories of criminal behavior It considers institutional social and individual issues related to criminal behavior while individually each raises questions about the adequacy of current theoretical claims The topics have significant implications both for policy and research in criminology Per Olof Wikstrom introduces a cross level action theory of crime He suggests that better understanding of causal mechanisms can lead to a situational theory of action based on perception of alternatives and the process of choice David Wolcott and Steven Schlossman provide new perspectives on the issues of racial disparity and the incarceration of adolescents in adult prisons These authors highlight gaps in our understanding of early twentieth century juvenile justice and negate some popular claims about recent changes in the criminal law Peter Grabosky spotlights privatization policies in the criminal justice system suggesting a framework for analyzing the balance of advantage resulting from three basic forms of institutional relationships in policing Steven Messner and Richard Rosenfeld discuss why institutional analysis has been seriously underdeveloped in etiological analyses of crime Jordan Pederson and Matthew Shane scrutinize the concept of aggression Their descriptions of aggressive behavior among non human animals provide a fascinating backdrop for understanding human actions Joan McCord emphasizes the intentionality of crimes as she argues that to understand what causes crime one must have a theory about what it means to act intentionally After critically appraising prior theories McCord introduces and defends a new theory of motivation based on a post empiricist theory of language This latest volume in the distinguished Advances in Criminological Theory series continues to add to the theoretical underpinnings of the field and will be important to all collections of social science
