Bureau of Forestry, 1906      *Prairie Farming in America* Sir James Caird, 1859      *Global Warming Gridlock* David G. Victor, 2011-03-10 Global warming is one of today's greatest challenges The science of climate change leaves no doubt that policies to cut emissions are overdue Yet after twenty years of international talks and treaties the world is now in gridlock about how best to do this David G Victor argues that such gridlock has arisen because international talks have drifted away from the reality of what countries are willing and able to implement at home Most of the lessons that policy makers have drawn from the history of other international environmental problems won't actually work on the problem of global warming Victor argues that a radical rethinking of global warming policy is required and shows how to make international law on global warming more effective This book provides a roadmap to a lower carbon future based on encouraging bottom up initiatives at national regional and global levels leveraging national self interest rather than wishful thinking      *The Fate of the Forest* Susanna B. Hecht, Alexander Cockburn, 2010 Susanna Hecht and Alexander Cockburn show the panorama of destruction as it unfolded and also reveal the extraordinary turnaround that is now taking place thanks both to the social movements and the emergence of new environmental markets Exploring the role of human hands in destroying and saving this vast forested region *The Fate of the Forest* pivots on the murder of Chico Mendes a legendary labor and environmental organizer who was assassinated after successful confrontations with big ranchers A multifaceted portrait complete with a new preface and afterword by the authors this book demonstrates that those who would hold a mirror up to nature must first learn the lessons offered by some of their own people Book Jacket      Season's Christmas
