G. Heath,2005-09 A lovely bookstore owner asked me why she should read this book I explained that in writing this book I undertook a purposeful investigation leading where angels and all good Baptists fear to tread It was during this attempt at explanation the picture formed in my mind of addressing an auditorium full of women My opening remark to them is Women hunger and thirst for romance What is it that men want The entire audience responds with a resounding chorus in unison with one word SEX I then ask No really ladies what do men really want Again with a single voice the chorus returns loudly SEX Seeing that I am getting nowhere fast I decide to try a new tack I ask Please ladies as a Romantic a Poet what do I as a man want Back it comes SEX There is a definite mind set at work here Okay honestly as a Romantic a Poet what do I want from a woman SEX Satisfied But my admission of common guilt is only true to a point Believe it or not ladies some men like myself want romance as much as you do It is in searching for this elusive thing that I have discovered so much that betrays you ladies in the very areas you are supposed to excel in the romance department I treat the causes and results of such betrayal in this book **Harm to Others** Brian Van Brunt,2014-12-16 Harm to Others offers students and clinicians an effective way to increase their knowledge of and training in violence risk and threat assessment and it also provides a comprehensive examination of current treatment approaches Although the text includes many examples from K 12 and college university settings which are particularly relevant for mental health professionals in school settings the underlying concepts and suggestions are useful for counselors psychologists and social workers who face these issues in their daily practice In an easy to understand jargon free manner Dr Van Brunt shares his observations extensive clinical expertise and the latest research on what clinicians should be aware of when performing risk and threat assessments In addition he offers numerous examples from recent mass shootings and rampage violence to help explain the motivations and risk factors of those who make threats Two detailed case examples are presented to illustrate key concepts related to assessing dangerousness Treatment options are then described using a variety of diverse case studies to demonstrate

concrete approaches for clients who have been identified as at risk for violence following a threat assessment Requests for digital versions from ACA can be found on www.wiley.com To purchase print copies please visit the ACA website
