Albert Einstein The Son in law of the Serbs the Yugoslavs      *The Collected Papers of Albert Einstein, Volume 1 (English)* Albert Einstein,1987-06-21

Volume 1 presents important new material on the young Einstein Over half the documents made available here were discovered by the editors including a significant group of over fifty letters that Einstein exchanged with Mileva Maric his fellow student and future wife These letters together with other previously unpublished documents provide an entirely new view of Einstein s youth The documents in the volume also foreshadow the emergence of his extraordinary creative power In them is manifested his intense commitment to scientific work and his interest in certain themes that proved to be central to his thinking during the next decade We can follow for example the beginnings of his preoccupation with the electrodynamics of moving bodies that was to lead to the development of this special theory of relativity For the first time it can be seen how closely he followed such contemporary developments in physics as Planck s work on radiation theory and Drude s work on the electron theory of metals In addition to all of Einstein s known correspondence and other writings from this period the volume includes the relevant portions of all third party letters and other contemporary documents that provide additional information about his secondary schooling at the Aargau Cantonal School his four years at the Swiss Federal Polytechnical School or the ETH and his search for a job after graduation Included in the volume are those sections of an unpublished biography by Einstein s sister Maja Winteler Einstein which deal with his early years his extensive notes on a physics course he took at the ETH and previously unpublished photographs of the young Einstein and his teachers and friends Documents in Volume 1 portray Einstein s experiences during the two stressful years after his graduation from the ETH in Zurich Denied a position as an Assistant at the ETH he lived a hand to mouth existence while he looked for a post at other universities then he attempted to find a secondary school post and finally sought a nonacademic job Tension with his parents over his plans to marry Mileva Maric is evident throughout this period With the help of a friend he finally found work at the Swiss Patent Office the haven where he would spend the next seven years Freed from his financial worries he entered on one of the most productive periods of his life as the next volume Writings 1901 1910 will document

**The Expanding Worlds of General Relativity** Hubert Goenner, Jürgen Renn, Jim Ritter, Tilman Sauer, 1998-12-01

The past decade has seen a considerable surge of interest in historical and philosophical studies of gravitation and relativity due not only to the tremendous amount of world wide research in general relativity and its theoretical and observational consequences but also to an increasing awareness that a collaboration between working scientists historians and philosophers of science is in this field particularly promising for all participants The expanding activity in this field is well documented by recent volumes in this Einstein Studies series on the History of General Relativity as well as by a series of international conferences on this topic at Osgood Hill 1986 Luminy 1988 and Pittsburgh 1991 The fourth of these conferences hosted by the Max Planck Institute for the History of Science was held in Berlin from 31 July to 3 August 1995 with a record attendance of some 80 historians and philosophers of science physicists mathematicians and astronomers Based on presentations at the Berlin conference this volume provides an overview of the present state of research in this field documenting not only the increasing scope of recent investigations in the history of relativity and gravitation but also the emergence of several key issues that will probably remain at the focus of debate in the near future

**RELATIVITY IN THE MAKING** The papers of this section deal with the origins and genesis of relativity theory
