The Philosophy of Joseph Petzoldt
Chiara Russo Krauss, 2023-01-12 This volume is the first English resource to shed light on the philosophy of Joseph Petzoldt 1862–1929 the main pupil of Ernst Mach and founder of the Gesellschaft für wissenschaftliche Philosophie later the association of Berlin logical positivists A central figure in the early debate on the theory of relativity his work was praised by Einstein himself Tracing the development of Petzoldt's ideas starting from his early acceptance of materialism and Kantian agnosticism Chiara Russo Krauss presents a comprehensive reconstruction of his philosophy in the context of the German milieu She examines his attempt to develop a new philosophy following Gustav Fechner and the empiriocriticism of Richard Avenarius and Ernst Mach In the final chapter she sets out how Petzoldt proposed relativistic positivism as the official interpretation of Einstein's relativity By illuminating key elements of Petzoldt's work this is a valuable case study for students and scholars of philosophy of science and late 19th century and early 20th century philosophy It reveals the complex interplay of two different tendencies of the time neo-Kantianism and its struggle to overcome the notion of thing in itself as well as the need for an epistemological foundation for the new advances of science

Einstein Before Israel Ze'ev Rosenkranz, 2021-08-10 Was Einstein a Zionist Albert Einstein was initially skeptical and even disdainful of the Zionist movement yet he affiliated himself with this controversial political ideology and today is widely seen as an outspoken advocate for a modern Jewish homeland in Palestine What enticed this renowned scientist and humanitarian who repeatedly condemned nationalism of all forms to radically change his views Was he in fact a Zionist Einstein Before Israel traces Einstein's involvement with Zionism from his initial contacts with the movement at the end of World War I to his emigration from Germany in 1933 in the wake of Hitler's rise to power Drawing on a wealth of rare archival evidence much of it never before published this book offers the most nuanced picture yet of Einstein's complex and sometimes stormy relationship with Jewish nationalism Ze'ev Rosenkranz sheds new light on Einstein's encounters with prominent Zionist leaders and reveals exactly what Einstein did and didn't like about Zionist beliefs objectives and methods He looks at the personal cultural and political factors that led Einstein to support certain goals of Jewish nationalism his role in the birth of the Hebrew University his impressions of the emerging Jewish settlements in Palestine and his reaction to mounting violence in the Arab Jewish conflict Rosenkranz explores a host of fascinating questions such as whether Zionists sought to silence Einstein's criticism of

their movement whether Einstein was the real manipulator and whether this Zionist icon was indeed a committed believer in Zionism or an iconoclast beholden to no one **EINSTEIN and the WORLD: TIMELINE** Institute for Advanced Physics Studies, Stefan University, 2016-12-19 Einstein's Timeline and the World Friday 11 30 a.m. March 14 1879 Ulm Germany Monday 1 15 a.m. April 18 1955 Princeton New Jersey USA Institute for Advanced Physics Studies Stefan University La Jolla California **Regarding, Inter Alia, Albert Einstein and Mileva Marich Einstein (Stefan University Press Series on Thus Spoke Einstein; ISSN: 1550-4115)** V. Alexander Stefan, 2005-12-01 Physicists around the world celebrated the year 2005 as The World Year of Physics 2005 honoring the achievements in physics research of Albert Einstein This booklet is dedicated to the World Year of Physics In this booklet I refute the claims that Mileva Marich Einstein played an important scientific role in his research Mileva Marich Einstein is of a Serb origin as am I I am a naturalized American of a Serb origin I based this presentation on the available material **The Genesis of General Relativity** Jürgen Renn, 2007-06-17 The transition from classical to modern physics in the first half of the twentieth century by quantum and relativity theories affected some of the most fundamental notions of physical thinking such as matter radiation space and time This transition thus represents a challenge for any attempt to understand the structures of a scientific revolution The present four volume work aims at a comprehensive account of the way in which the work of Albert Einstein and his contemporaries changed our understanding of space time and gravitation The conceptual framework of classical nineteenth century physics had to be fundamentally restructured and reinterpreted in order to arrive at a theory of gravitation compatible with the new notions of space and time established in 1905 by Einstein's special theory of relativity Whereas the classical theory of gravitation postulated an instantaneous action at a distance Einstein's new relativistic kinematics rather suggested an analogy between the gravitational field and the electromagnetic field propagating with a finite speed It is therefore not surprising that Einstein was not alone in addressing the problem of formulating a theory of gravitation that complies with the kinematics of relativity theory The analysis of these alternative approaches as well as of earlier alternative approaches to gravitation within classical physics turns out to be crucial for identifying the necessities and contingencies in the actual historical development *Albert and Mileva Einstein, World Year of Physics 2005, and More* V. Alexander Stefan, 2005-11-10 The World Year of Physics 2005 honors the achievements in physics research of Albert Einstein the worldwide known sad eyed genius In 1905 Albert Einstein had completed his doctoral thesis and published 4 physics papers including his Special Relativity paper The world of physics and the world in general has been since changed forever As the human race is stepping into the 3rd Millennium of the Common Era the influence of Albert Einstein is ever stronger the works of Einstein still play the major role in the further development of physics and science and technology **The Ultimate Quotable Einstein** Albert Einstein, 2019-12-31 The most comprehensive collection of Einstein quotations ever published Here is the definitive new edition of the hugely popular collection of Einstein quotations that has sold tens of thousands of copies worldwide and been translated into twenty five
