Alexander Stefan,2005-11-10 The World Year of Physics 2005 honors the achievements in physics research of Albert Einstein the worldwide known sad eyed genius In 1905 Albert Einstein had completed his doctoral thesis and published 4 physics papers including his Special Relativity paper The world of physics and the world in general has been since changed forever As the human race is stepping into the 3rd Millennium of the Common Era the influence of Albert Einstein is ever stronger the works of Einstein still play the major role in the further development of physics and science and technology *Albert Einstein: The Son-in-law of the Serbs (the Yugoslavs)* V. Alexander Stefan,2017-02-24 Albert Einstein The Son in law of the Serbs the Yugoslavs **Regarding, Inter Alia, Albert Einstein and Mileva Marich Einstein (Stefan University Press Series on Thus Spoke Einstein; ISSN: 1550-4115)** V. Alexander Stefan,2005-12-01 Physicists around the world celebrated the year 2005 as The World Year of Physics 2005 honoring the achievements in physics research of Albert Einstein This booklet is dedicated to the World Year of Physics In this booklet I refute the claims that Mileva Marich Einstein played an important scientific role in his research Mileva Marich Einstein is of a Serb origin as am I I am a naturalized American of a Serb origin I based this presentation on the available material **The Collected Papers of Albert Einstein, Volume 1 (English)** Albert Einstein,1987-06-21 Volume 1 presents important new material on the young Einstein Over half the documents made available here were discovered by the editors including a significant group of over fifty letters that Einstein exchanged with Mileva Maric his fellow student and future wife These letters together with other previously unpublished documents provide an entirely new view of Einstein s youth The documents in the volume also foreshadow the emergence of his extraordinary creative power In them is manifested his intense commitment to scientific work and his interest in certain themes that proved to be central to his thinking during the next decade We can follow for example the beginnings of his preoccupation with the electrodynamics of moving bodies that was to lead to the development of this special theory of relativity For the first time it can be seen how closely he followed such contemporary developments in physics as Planck s work on radiation theory and Drude s work on the electron theory of metals In addition to all of Einstein s known correspondence and other writings from this period the volume includes the relevant portions of all third party letters and other contemporary documents that provide additional information about his secondary schooling at the Aargau Cantonal School his four years at the Swiss Federal Polytechnical School or the ETH and his search for a job after graduation Included in the volume are those sections of an unpublished biography by Einstein s sister Maja Winteler Einstein which deal with his early years his extensive notes on a physics course he took at the ETH and previously unpublished photographs of

the young Einstein and his teachers and friends Documents in Volume 1 portray Einstein's experiences during the two stressful years after his graduation from the ETH in Zurich Denied a position as an Assistant at the ETH he lived a hand to mouth existence while he looked for a post at other universities then he attempted to find a secondary school post and finally sought a nonacademic job Tension with his parents over his plans to marry Mileva Maric is evident throughout this period With the help of a friend he finally found work at the Swiss Patent Office the haven where he would spend the next seven years Freed from his financial worries he entered on one of the most productive periods of his life as the next volume Writings 1901-1910 will document EINSTEIN and the WORLD: TIMELINE Institute for Advanced Physics Studies, Stefan University, 2016-12-19 Einstein's Timeline and the World Friday 11:30 a.m. March 14, 1879 Ulm Germany Monday 1:15 a.m. April 18, 1955 Princeton New Jersey USA Institute for Advanced Physics Studies Stefan University La Jolla California
