**The Apallic Syndrome** E. Rothmund, G. Dalle Ore, F. Gerstenbrand, C. H. Lücking, G. Peters, U. H. Peters, 2012-12-06 The subject of the apallic syndrome is one which has long been familiar to me although I have not personally studied it as deeply as I would have wished I became acquainted with this syndrome long before the last war when my neurosurgical colleague Hugh Cairns 1952 made his pioneer contribution under the term akinetic mutism This was an arresting title but it was one which did not altogether satisfy some of his colleagues including myself We found it difficult to suggest an alternative That is one reason why I welcome the expression apallic syndrome Forensic practice has forced me from time to time to consider rather more deeply this distressing syndrome and to try and marshal my ideas in a form which would satisfy my colleagues in the legal profession More than once I have been instructed to make a medico legal assessment of these unfortunate patients The points which have concerned my lawyer friends have not been matters of diagnosis or of morbid anatomy or of etiology The factual problem which has been put before me was to make some approximate assessment as to the expectation of life Vague guess work is unacceptable in such circumstances What the lawyers require is a precise and dogmatic answer
