The Combined Food Board A Study In Wartime International Planning:

The Combined Food Board Eric Roll,1956 *The Combined Food Board. A Study in Wartime International Planning. [With Plates.]*. Eric ROLL (Baron Roll of Ipsden, K.C.M.G., C.B.),1956 **A Companion to World War II** Thomas W. Zeiler,Daniel M. DuBois,2012-12-21 A Companion to World War II brings together a series of fresh academic perspectives on World War II exploring the many cultural social and political contexts of the war Essay topics range from American anti-Semitism to the experiences of French African soldiers providing nearly 60 new contributions to the genre arranged across two comprehensive volumes A collection of original historiographic essays that include cutting edge research Analyzes the roles of neutral nations during the war Examines the war from the bottom up through the experiences of different social classes Covers the causes key battles and consequences of the war **The Combined Food Board** Eric Roll Baron Roll of Ipsden,1956 *Food for War* Alan F. Wilt,2001-09-20 Food for War is a ground breaking study of Britain s food and agricultural preparations in the 1930s as the nation once again made ready for war Historians writing about 1930s Britain have usually focused on the Depression appeasement or political military and industrial concerns None have dealt adequately with another significant topic food and agriculture as the nation moved albeit reluctantly from peace to war In this new account Alan F Wilt makes right this omission by examining in depth the relationship between food agriculture and the nation s preparations for war He reveals how food and agriculture became closely linked to rearmament as early as 1936 that the government s preparations in this sector as contrasted with other areas of the economy were relatively well developed when war broke out in 1936 and that rural and farm interests well understood the effect that war would have on their way of life He argues that food and agriculture need to be integrated into the more general historical discourse for what happened in Britain in the 1930s not only set the stage for World War II but also contributed to a more robust agriculture in the decades that followed *War, Agriculture, and Food* Paul Brassley,Yves Segers,Leen van Molle,2012 Between the 1930s and the 1950s rural life in Europe underwent profound changes partly as a result of the Second World War and partly as a result of changes which had been in progress over many years This book examines a range of European countries from Scandinavia to Spain and Ireland to Hungary during this crucial period and identifies the common pressures to which they all responded and the features that were unique to individual countries In particular it examines the processes of agricultural development over western Europe as a whole the impact of the war on international trading patterns the relationships between states and farmers and the changing identities of rural populations It presents a bold attempt to write rural history on a European scale and will be of interest not only to historians and historical geographers but also to those interested in the historical background to the Common Agricultural Policy of the European Union to which the changes discussed here provided a dramatic prologue National Planning In The United States David E. Wilson,2019-03-13 This annotated bibliography of more than 2 000 entries current through 1977 sheds light on the national planning idea as a substantive issue

The big 'L' : American logistics in World War II , The Political History of American Food Aid

Barry Riley,2017 American food aid to foreigners long has been the most visible and most popular means of providing humanitarian aid to millions of hungry people confronted by war terrorism and natural cataclysms and the resulting threat often the reality of famine and death The book investigates the little known not well understood and often highly contentious political processes which have converted American agricultural production into tools of U S government policy In The Political History of American Food Aid Barry Riley explores the influences of humanitarian domestic agricultural policy foreign policy and national security goals that have created the uneasy relationship between benevolent instincts and the realpolitik of national interests He traces how food aid has been used from the earliest days of the republic in widely differing circumstances as a response to hunger a weapon to confront the expansion of bolshevism after World War I and communism after World War II a method for balancing disputes between Israel and Egypt a channel for disposing of food surpluses a

signal of support to friendly governments and a means for securing the votes of farming constituents or the political support of agriculture sector lobbyists commodity traders transporters and shippers Riley's broad sweep provides a profound understanding of the complex factors influencing American food aid policy and a foundation for examining its historical relationship with relief economic development food security and its possible future in a world confronting the effects of global climate change

Ganson, 2009-04-27 This book illuminates a little known but tremendously significant twentieth century crisis in the Soviet Union Drawing on archival materials declassified since the fall of communism Nicholas Ganson situates the famine of 1946-47 at the crossroads of Soviet social and political history World War II the Cold War ideology and famine in the modern world He sheds light on the perspectives of Soviet elites and gives voice to the famine's victims In revealing the multi causality of the postwar hunger this ambitious work challenges the received wisdom about the relationship between politics and famine

Taste of War Lizzie Collingham, 2012-03-29 A New York Times Notable Book of 2012 Food and in particular the lack of it was central to the experience of World War II In this richly detailed and engaging history Lizzie Collingham establishes how control of food and its production is crucial to total war How were the imperial ambitions of Germany and Japan ambitions which sowed the seeds of war informed by a desire for self sufficiency in food production How was the outcome of the war affected by the decisions that the Allies and the Axis took over how to feed their troops And how did the distinctive ideologies of the different combatant countries determine their attitudes towards those they had to feed Tracing the interaction between food and strategy on both the military and home fronts this gripping original account demonstrates how the issue of access to food was a driving force within Nazi policy and contributed to the decision to murder hundreds of thousands of useless eaters in Europe Focusing on both the winners and losers in the battle for food The Taste of War brings to light the striking fact that war related hunger and famine was not only caused by Nazi Germany and Imperial Japan but was also the result of Allied mismanagement and neglect particularly in India Africa and China American dominance both during and after the war was not only a result of the United States immense industrial production but also of its abundance of food This book traces the establishment of a global pattern of food production and distribution and shows how the war subsequently promoted the pervasive influence of American food habits and tastes in the post war world A work of great scope The Taste of War connects the broad sweep of history to its intimate impact upon the lives of individuals
