Communication Media and Identity A Christian Theory of Communication is the first comprehensive theoretical look at the nature of communication from a biblical Christian perspective This groundbreaking new work discusses the implications of such a theory for interpersonal relations use of media and the development of digital culture in the wake of the computer It also draws widely from the literature of the secular world critiquing perspectives where necessary and adopting perspectives that are in line with Christian anthropology epistemology and ontology Through this unique lens the reader is able to understand communication as an art as a tool for evangelism and as a unique human activity that allows people to have a stake in the creation It covers both mediated and non mediated forms of communication is sensitive to theological differences within the Christian faith and examines closely the problem of technology and especially digital technology for the practice of communication As the newest book in the Communication Culture and Religion Series Robert Fortner's work illuminates the theological aspects of communication

Communication, Media, and Identity Robert S. Fortner, 2007 *Communication Media and Identity* A Christian Theory of Communication is the first comprehensive theoretical look at the nature of communication from a biblical Christian perspective This groundbreaking new work discusses the implications of such a theory for interpersonal relations use of media and the development of digital culture in the wake of the computer It also draws widely from the literature of the secular world critiquing perspectives where necessary and adopting perspectives that are in line with Christian anthropology epistemology and ontology Through this unique lens the reader is able to understand communication as an art as a tool for evangelism and as a unique human activity that allows people to have a stake in the creation It covers both mediated and non mediated forms of communication is sensitive to theological differences within the Christian faith and examines closely the problem of technology and especially digital technology for the practice of communication As the newest book in the *Communication Culture and Religion* Series Robert Fortner s work illuminates the theological aspects of communication

The Christian Faith Friedrich Schleiermacher, 1928 In the opinion of competent thinkers the *Christian Faith* of Schleiermacher is with the exception of Calvin s *Institutes* the most important work covering the whole field of doctrine to which Protestant theology can point To say this is not necessarily to adopt either his fundamental principles or the detailed conclusions to which these principles have guided him On all such matters a nearly unbroken controversy has long prevailed Indeed at the moment a formidable attack

is being delivered upon his main positions by a new and active school of thought in Germany But whether for acceptance or rejection it is necessary for serious students to know what Schleiermacher has to say Editors preface page v *Let the Words be Written* Philip C. Stine, 2004 Report of the Working Party on the Communication of the Christian Faith, 19??

The Christian Faith Friedrich Schleiermacher, 1999-01-11 The classic work of Christian theology which seeks to present the Christian faith in its entirety Schleiermacher was equally at home in the theological systems of Protestant orthodoxy and the new world of thought shaped by the historical and natural sciences and German philosophy He follows a confident course through the entire range of themes in dogmatics but leaves both the dogmatic task and the individual themes transformed by a powerful and original mind A new foreword by B A Gerrish summarises the dogmatic goals of *The Christian Faith* and corrects some common misreadings of his work
