The Human Rights City Michele Grigolo, 2019-04-11 We are used to thinking of human rights as a matter for state governments to deal with Much less investigated is the question of what cities do with them even though urban communities and municipalities have been discussing human rights for quite some time In this volume Grigolo borrows the concept of the human rights city to invite us to think about a new urban utopia a place where human rights strive to guide urban life By turning the question of the meaning and use of human rights in cities into the object of critical investigation this book tracks the genesis institutionalisation and implementation of human rights in cities focussing on New York San Francisco and Barcelona Touching also upon matters such as women s rights LGBT rights and migrant rights The Human Rights City emphasises how

human rights can serve urban justice but also a neoliberal practice of the city This book is a useful resource for scholars and students interested in fields such as Sociology of Human Rights Sociology of Law International Law Urban Sociology Political Sociology and Social Policies **Freedom of Association** Amy Gutmann, 2020-10-06 Americans are joiners They are

members of churches fraternal and sororal orders sports leagues community centers parent teacher associations professional associations residential associations literary societies national and international charities and service organizations of seemingly all sorts Social scientists are engaged in a lively argument about whether decreasing proportions of Americans over the past several decades have been joining secondary associations but no one disputes that freedom of association remains a fundamental personal and political value in the United States Nothing Alexis de Tocqueville argued deserves more attention Yet the value and limits of free association in the United States have not received the attention they deserve Why is freedom of association valuable for the lives of individuals What does it contribute to the life of a liberal democracy This volume explores the individual and civic values of associational freedom in a liberal democracy as well as the moral and constitutional limits of claims to associational freedom Beginning with an introductory essay on freedom of association by Amy Gutmann the first part of this timely volume includes essays on individual rights of association by George Kateb Michael Walzer Kent Greenawalt and Nancy Rosenblum and the second part includes essays on civic values of association by Will Kymlicka Yael Tamir Daniel A Bell Sam Fleischacker Alan Ryan and Stuart White **License to Wed** Kimberly D.

Richman, 2015-06-08 A critical reader of the history of marriage understands that it is an institution that has always been in flux It is also a decidedly complicated one existing simultaneously in the realms of religion law and emotion And yet recent years have seen dramatic and heavily waged battles over the proposition of including same sex couples in marriage Just what is at stake in these battles License to Wed examines the meanings of marriage for couples in the two first states to extend that right to same sex couples California and Massachusetts The two states provide a compelling contrast while in California the rights that go with marriage inheritance custody and so forth were already granted to couples under the state's domestic partnership law those in Massachusetts did not have this same set of rights At the same time Massachusetts has offered civil marriage consistently since 2004 Californians on the other hand have experienced a much more turbulent legal path And yet same sex couples in both states seek to marry for a variety of interacting overlapping and evolving reasons that do not vary significantly by location The evidence shows us that for many of these individuals access to civil marriage in particular not domestic partnership alone no matter how broad and not a commitment ceremony alone no matter how emotional is a home of such personal civic political and instrumental resonance that it is ultimately difficult to disentangle the many meanings of marriage This book attempts to do so and in the process reveals just what is at stake for these couples how access to a legal institution fundamentally alters their consciousness and what the impact of legal inclusion is for those traditionally excluded

Affirmative Action is Dead Faye J. Crosby,2004-01-01 This book answers this important question It examines explanations put forth by social scientists finding various degrees of truth in most of them Some situate the problem in the policy itself suggesting that affirmative action functions as a governmentally sanctioned form of reverse racism or sexism or that it is ineffective or socially disruptive Such explanations may sound plausible but they are incorrect Other explanations locate the problem in the people who react to the policy citing studies that document the links between ignorance prejudice and opposition to affirmative action Yet even well informed egalitarian people sometimes oppose affirmative action

critique for the first time those approaches to political science that offer a more fine grained qualitative analysis of the political world The work in the volume has a common aim in being sensitive to the thoughts of contextual nuances that disappear from large scale quantitative modelling or explanations based on abstract general universal laws of human behavior It shows that context matters in a great many ways philosophical context matters psychological context matters cultural and historical contexts matter place population and technology all matter By showcasing scholars who specialize in the analysis of all these contexts side by side the Oxford Handbook of Contextual Political Analysis shows how political scientists can take those crucial contextual factors systematically into account **Accidental Activists** Celeste L. Arrington, 2016-03-01 Government wrongdoing or negligence harms people worldwide but not all victims are equally effective at obtaining redress In *Accidental Activists* Celeste L Arrington examines the interactive dynamics of the politics of redress to understand why not Relatively powerless groups like redress claimants depend on support from political elites active groups in society the media experts lawyers and the interested public to capture democratic policymakers attention and sway their decisions Focusing on when and how such third party support matters Arrington finds that elite allies may raise awareness about the victims cause or sponsor special legislation but their activities also tend to deter the mobilization of fellow claimants and public sympathy By contrast claimants who gain elite allies only after the difficult and potentially risky process of mobilizing societal support tend to achieve more redress which can include official inquiries apologies compensation and structural reforms Arrington draws on her extensive fieldwork to illustrate these dynamics through comparisons of the parallel Japanese and South Korean movements of victims of harsh leprosy control policies blood products tainted by hepatitis C and North Korean abductions Her book thereby highlights how citizens in Northeast Asia a region grappling with how to address Japan s past wrongs are leveraging similar processes to hold their own governments accountable for more recent harms *Accidental Activists* also reveals the growing power of litigation to promote policy change and greater accountability from decision makers Overseers of the Poor John Gilliom, 2001-12 Presents the views and experiences of low income American mothers who live everyday with the advanced surveillance capacity of the modern welfare state In their pursuit of food health care and shelter for their families they are watched analyzed assessed monitored checked and reevaluated in an ongoing process involving supercomputers caseworkers fraud control agents grocers and neighbors They know surveillance preface Domestic Violence and the Politics of Privacy Kristin Anne Kelly, 2003 Argues that understanding resistance to countermeasures against domestic violence requires recognizing the tension within liberalism between preserving the privacy of the family and protecting vulnerable individuals back cover
