The Golden Age of Buses & Trams Henry Hirst,2020-10-22 Public transport has now been around for over 150 years in one shape or another and this book takes a nostalgic look at the heritage and story of Buses and Trams Tramways when operated in the 19th century and beyond formed a large part of the community in towns and cities helping to get people around in style using steam and electric technology Trams over time were however up against the might of the internal combustion engine in the shape of the emerging petrol and diesel powered buses These newfangled vehicles didn't require rails or overhead cables and could go just about anywhere There was also of course the electric trolleybus that sat somewhere between a bus and tram The tram has thankfully made comebacks over the years and buses have evolved with the times so join us looking through the early years to more recent times This book is full of facts information about the manufacturers insight about the classic buses and includes some superb archive pictures

### **Britain's Preserved Trams**

Peter Waller,2021-10-30 It is almost 100 years since the first tram was preserved in Britain in the century since then a great variety of trams have been saved from tramway systems small and large Some trams were purchased directly out of service and others were acquired after many years alternative usage some being summer houses or homes while others were used on farms or allotments where they served as sheds and out buildings before being lovingly restored over many years The story of tram preservation is not wholly positive in the early days many trams suffered from being stored in the open at unsafe sites where the historic vehicles were often subjected to acts of vandalism and suffered badly from the weather This changed to a large extent in 1959 with the acquisition of the site of the future National Tramway Museum at Crich in Derbyshire where a comprehensive collection of trams from all over Britain and also foreign tram networks has been assembled to secure a collection of tramcars for future generations There is also today fine collections of trams in other museums in Britain and Ireland which cover much of the rich history of this once common form of public transport This book looks at almost 200 of these trams when they were in service through historic photographs prior to their withdrawal and eventual preservation

*The Melbourne Tram Book* Randall Wilson,Dale Budd,2014-12-01 Melbourne's trams are more than a mode of transport They are a symbol of the city This fully updated new edition of The Melbourne Tram Book is a colourful and compact tribute to Melbourne's famous trams one of the city's most enduring symbols More than 200 photographs and illustrations show trams in the streetscapes of today and yesterday with detailed commentary from tram experts Randall Wilson and Dale Budd

*Britain's Second-Hand Trams* Peter Waller,2021-05-30 During the history of Britain's electric tramcar fleets many thousands were manufactured of which the vast majority saw out their operational life with a single owner However for several hundred there was to be a second if not in certain cases a third career with a new operator Almost from the dawn of the electric era in the late 19th century tramcars were loaned or bought and sold between operators

The reasons for this were multifarious Sometimes the aspirations of the original owners for traffic proved wildly optimistic and the fleet was downsized to reflect better the actual passenger levels War was a further cause as operators sought to strengthen their fleets to cater for unexpectedly high level of demand or to replace trams destroyed by enemy action For other operators modernization represented an opportunity to sell older cars while certainly from the 1930s a number of operators such as Aberdeen Leeds and Sunderland took advantage of the demise of tramways elsewhere to supplement their fleet with trams that were being withdrawn but which still had many years of useful operational life in them The process was to continue right through to the mid 1950s when Glasgow took advantage of the demise of the once extensive Liverpool system to purchase a number of the streamlined bogie bogie cars that were built in the late 1930s In this book the author provides a pictorial history with detailed captions to the many electric trams that were to operate with more than one tramway during the period up to the closure of the Glasgow system in 1962 [The Blackpool Streamlined Trams](#) Peter Waller,2020-12-30 What a variety are pictured here Double deck balloon cars single deckers including open topped cars and various illuminated cars a specialty of the town York Model Engineers newsletter In the early 1930s the tramcar in Blackpool was at a crossroads the system needed investment in both new track and new trams while there was a serious threat that the town routes might be converted to bus operation The appointment of Walter Luff as the new general manager was however to prove a turning point Working closely with English Electric based in nearby Preston Luff developed a series of streamlined trams both single deck and double deck that were to revolutionize the town s tramway By the end of 1930s the corporation had acquired more than 100 new trams the majority built by English Electric but with twenty coming from Brush that ensured the survival not only of the key route along the Promenade to Fleetwood but also of the bulk of the town routes Over the next seventy years these trams were to form the cornerstone of the Blackpool system It was only with the modernization of the system in the first decade of the 20th century that finally they became largely obsolete but still as part of the heritage fleet they remain very much part of the contemporary Blackpool scene This book examines the history of Blackpool s streamlined trams of the 1930s from development through to preservation An important addition to the more straightforward business and picture book histories of the Blackpool tram network which local historians and industrial archaeologists will find of great value aiding future studies of this subject Transactions of the Lancashire and Cheshire Antiquarian Society **Lost Tramways of England** Peter Waller,2021-08-24 Once the largest tramway network in the British Isles London s tramways had belonged to a range of operators until the London Passenger Transport Board was created in July 1933 and this resulted in a great variety of tramcars being operated in the Metropolis This is one of four volumes to cover the history of electric tramcar operation in the city Once stretching as far east as Dartford much of the network south east of the River Thames survived World War II and remained operational until conversion commenced in 1950 Locations featured include Abbey Wood Beresford Square Woolwich Bermondsey Bexleyheath Blackfriars Road
