The Greatest Sedition is Silence William Rivers Pitt,2003-05-20 This caustic critique of the last four years of American government gives voice to the growing tide of dissent and outrage with America's leaders both inside the country and in the wider world This book argues that under George W Bush America makes a mockery of the values of liberty and truth that it purports to stand for and that it is now more important than ever to speak out It reveals how the crisis in America was engineered by a group of Christian conservatives whose attempts in 1998 to bring down the Clinton government led to the perversion of the American electoral process resulting in the illegitimate installation of George W Bush into the Presidency In the aftermath of September 11th America has in many senses lost its way Citizens are counselled to watch what they say by the White House just as questions of deadly import are ignored by the government and the media In their rush to defend liberty George Bush and his allies are actually endangering the freedom of the individual as laid down in international law Yet how do we save freedom by limiting it Why after all this time have there been no answers regarding what really happened on 9/11
