**Colonial Legacies** Anne E. Booth, 2007-09-30

It is well known that Taiwan and South Korea both former Japanese colonies achieved rapid growth and industrialization after 1960. The performance of former European and American colonies Malaysia, Singapore, Burma, Vietnam, Laos, Cambodia, Indonesia, and the Philippines has been less impressive. Some scholars have attributed the difference to better infrastructure and greater access to education in Japan's colonies. Anne Booth examines and critiques such arguments in this ambitious comparative study of economic development in East and Southeast Asia from the beginning of the twentieth century until the 1960s. Booth takes an in-depth look at the nature and consequences of colonial policies for a wide range of factors including the growth of export-oriented agriculture and the development of manufacturing industry. She evaluates the impact of colonial policies on the growth and diversification of the market economy and on the welfare of indigenous populations. Indicators such as educational enrollments, infant mortality rates, and crude death rates are used to compare living standards across East and Southeast Asia in the 1930s. Her analysis of the impact that Japan's Greater Asian Co-Prosperity Sphere and later invasion and conquest had on the region and the living standards of its people leads to a discussion of the painful and protracted transition to independence following Japan's defeat. Throughout, Booth emphasizes the great variety of economic and social policies pursued by the various colonial governments and the diversity of outcomes. Lucidly and accessibly written, *Colonial Legacies* offers a balanced and elegantly nuanced exploration of a complex historical reality. It will be a lasting contribution to scholarship on the modern economic history of East and Southeast Asia and of special interest to those concerned with the dynamics of development and the history of colonial regimes.

**Southeast Asia and the Rise of Chinese and Indian Naval Power** Sam Bateman, Joshua Ho, 2014-06-03. This book examines the emerging maritime security scene in Southeast Asia. It considers highly topical implications for the region of possible strategic competition between China and India, the rising naval powers of Asia, with a possible naval arms race emerging between these countries, both with naval force development and operations. As part of its Look East policy, India has deployed naval units to the Pacific Ocean for port visits and exercises, both with East Asian navies and the US Navy, but India is also concerned about the possibility of the Chinese Navy operating in the Indian Ocean. Even as the US-India defence relationship continues to deepen, the US and China are struggling to build closer links. China's and India's strategic interests overlap in this region, both in maritime strategic competition or conflict, which might be played out in the Bay of Bengal, the Malacca and Singapore Straits, and the South China Sea. The sea lines of communication (SLOCs) through Southeast Asian waters constitute vital choke points between the Indian and Pacific Oceans, carrying essential energy supplies for China and other Northeast Asian countries. Any strategic competition between China and India has implications for other major maritime players in the Pacific and Indian Oceans, especially Australia, the Republic of Korea, and Japan, as well as the US. This book identifies possible cooperative and

confidence building measures that may contribute to enhanced relations between these two major powers and dampen down the risks associated with their strategic competition

**Structural Transformation in the Escape from Poverty** Martin Andersson,Tobias Axelsson,2016-04-21 This volume analyzes the experiences of developing countries in Asia Latin America and Sub Saharan Africa and examines how they might catch up Based on growth performance across the developing world over the last five decades it offers a thorough account of the possibilities to engage in such processes in an increasingly globalized world Together the chapters highlight the diversity and variation of development pathways and provide valuable lessons and implications for how to approach this difficult question The book shows the importance of acknowledging that the process of development is dynamic and that the possibilities for catch up are situation dependent At the same time it makes clear that without structural change and in particular agricultural transformation sustained catch up is unlikely to happen The volume demonstrates how analysis of current growth processes in developing countries can be enriched by paying closer attention to the multifaceted nature of both economic backwardness and successful pathways to escape it
