Technology and the Common Good Allen Batteau, 2022-06-10 Building on the work of Elinor Ostrom Governing the Commons the author examines how the different shared goods of a democratic society are shaped by technology and demonstrates how club goods common pool resources and public goods are supported enhanced and disrupted by technology He further argues that as the common good is undermined by different interests it should be possible to reclaim technology if the members of the society conclude that they have something in common

Cultural Landscapes Gabriel R. Ricci, 2018-02-06 A dualism between man and nature has been a persistent feature of Western thought and spirituality from ancient times to the present The opposition of mind and body consciousness and world has tended to obscure the ways in which humans are ecologically part of interconnected systems some of which are obvious while others operate in hidden but life sustaining ways Cultural Landscapes explores the physical ways in which we are intimately linked to the land and the

intellectual and aesthetic connections human consciousness has with the landscape Following the editor's introductory essay the lead article by Jame Schaeffer Quest for the Common Good A Collaborative Public Theology for a Life Sustaining Climate assesses the lightning rod issue of global warming in the context of a public and ecumenical theology and sets the tone for this normative assessment of our relationship with nature Likewise David Kenley's essay Three Gorges be Dammed The Philosophical Roots of Environmentalism in China reveals the traditional philosophical and cultural values that can sustain a vital environmentalism in the East David Brown's historical insights into the use of the American landscape to define historical writing complement Patricia Likos Ricci's historical treatment of nineteenth century landscape painting and the first call to preserve wilderness in the United States Matt Willen An Feochszn and David Martinez What Worlds are Made of The Lakota Sense of Place both demonstrate how space is transformed into place through song and mythic tales On a metaphysical note Andreas Philippopoulos Mihalopolos essay On the Line of the Horizon Anxiety in de Chirico's Metaphysical Spaces provides the reader with psychological and existential insights into the disorienting paintings of de Chirico and Gabriel Ricci's concluding essay tours the landscape that underpins Heidegger's ontological speculations The contributions to this volume are posited on the belief that culture society and human history are ultimately rooted in the natural world This integration may explain why humanity has always looked to nature for moral and ethical guidelines Gabriel R Ricci is associate professor of humanities and the chair of the Department of History at Elizabethtown College in Pennsylvania He is the author of Time Consciousness The Philosophical Uses of History published by Transaction

That They be One Michael Joseph Schuck, 1991 The social teaching of the Roman Catholic Church has aroused public interest in recent years with the increased involvement of North American bishops in matters of civic morality with the growth of liberation theology in Central and South America and with the ongoing political and economic statements of Pope John Paul II A vital ingredient of Roman Catholic social teaching is the papal encyclical literature Debate grows however over exactly what the papal letters teach Noteworthy encyclical commentaries exist but none has attempted a comprehensive historical analysis of the complete content and overall coherence of Roman Catholic encyclical social teaching This book appearing in advance of the 1991 centennial of Rerum novarum provides the kind of analysis that concerned Roman Catholics public officials social ethicists theologians and students are looking for a textually inclusive and topically broad gauged study of Catholic social teaching in its historical development with a forthright assessment of the teaching's contradictions and consistencies

Sacred and Social Kenneth R. Himes, 2025-05-01 A study of the deep historical roots of Catholic Social Teaching What is often neglected in studies of Catholic Social Teaching CST is the underlying theology that it presumes especially the biblical and patristic roots that have forged a broader tradition of social thought than is found in the more recent writings of the Catholic hierarchy Sacred and Social fills this gap by providing an extended analysis of the Catholic understanding of the human person especially the beliefs in human dignity and humanity's essentially social nature Himes argues that before the

documents of the modern papacy a rich tradition already shaped and informed the Catholic lens on social reality He illustrates the theological basis for the ethical commitments of CST with the fundamental theological themes creation incarnation Trinity Body of Christ that gave rise to the Catholic social imagination *A Liberalism Safe for Catholicism?* Daniel Philpott, Ryan T. Price, Kenneth R. Melchin, 2022-03-31 The clash of religion and politics has been a steady source of polarization in North America In order to think wisely and constructively about the spiritual dimension of our political life there is need for an approach that can both maintain the diversity of belief and foster values founded on the principles of religion In Spiritualizing Politics without Politicizing Religion James R Price and Kenneth R Melchin provide a possible framework approaching issues in politics via a profile of Sargent

Shriver 1915 2011 an American diplomat politician and a driving force behind the creation of the Peace Corps Focusing on the speeches Shriver delivered in the course of his work to advance civil rights and build world peace Price and Melchin highlight the spiritual component of his efforts to improve institutional structures and solve social problems They contextualize Shriver s approach by contrasting it with contemporary landmark decisions of the U S Supreme Court on the role of religion in politics In doing so *Spiritualizing Politics without Politicizing Religion* explains that navigating the relationship of religion and politics requires attending to both the religious diversity that politics must guard and the religious involvements that politics needs to do its work

Clinical Bioethics James F. Drane, 1994-03 Medical practice is an inherently ethical enterprise More than ever before medical practice requires that medical professionals develop and exercise high ethical standards Health care practitioners who ignore basic concepts of medical ethics risk exposing their patients to serious harm and open themselves and their institutions to charges of malpractice *Clinical Bioethics* provides for the busy clinical professional a concise comprehensive treatment of the basics in this complex new field

Sullins, 2008-10-25 *Catholic Social Thought* presents detailed commentary and response to the Vatican s 2005 Compendium of the Social Doctrine of the Church with contributions from outstanding American scholars Addressing theology social theory the family economy government labor global society gender peace and the environment the various authors explore the core theology explain the Compendium s themes and arguments and apply their own intellectual powers to applications of its teachings Some of the essays are largely expository some more critical in both positive and negative senses Some operate from a standard of magisterial assent in conformity with *Ad Tuendam Fidem* others do not Together the essays represent the range of Catholic thinking on social issues in the American Church today

Economic Pluralism Robert F Garnett Jr, Erik Olsen, Martha Starr, 2009-09-10 Economists in the post Cold War era are increasingly circumspect about universal one size fits all conceptions of human behaviour and economic institutions Contemporary economics is thus marked by a nascent pluralism *Economic Pluralism* brings these pluralist sensibilities to the fore Its twenty original essays explore the positive potential and critical limits of pluralism in economic theory philosophy institutions and policies and education These twenty original essays reflect the maturity and breadth of pluralist scholarship in economics today The first eight chapters including critical essays by Tony Lawson Diana Strassmann et al Frederic Lee and David Colander stake out contentious positions on the value of pluralism in economic theory and philosophy The remaining chapters explore the meaning and consequences of pluralism in economic education institutions and policies This volume provides a unique second generation discussion of pluralism in economics Its twenty original essays stake out contentious positions on pluralism in economic theory philosophy institutions and policies and education reflecting multiple generations and traditions of thought It is a volume certain to spur wider conversation about the scope and value of economic pluralism for the 21st century This volume would be of most interest as a supplementary text for graduate or undergraduate

courses that include units on heterodox economics or economic philosophy Ethical Dimensions of the Economy Wilfried Ver Eecke, 2008-03-19 Overview This book is a philosophical reflection using mainly Hegel in addition to 1 Adam Smith Kant Marx and Catholic Social Thought about the socio-political dimension of economics In it I both agree and disagree with the slogan that the least government is the best government I agree with the slogan in particular as it applies to the economic domain Adam Smith taught us that rational and self-interested individuals left by themselves create a more efficient and reliable economic system than one in which the government has a heavy role as was the case in his time with the mercantile system Smith 14-651 Ludwig von Mises demonstrated the same idea for the communist command economy Hayek 1935-87-130 I do agree with the above mentioned slogan if it is interpreted as suggesting that we can best forget about the role of the government for a good functioning economy Instead I will argue that the government has an important function in creating the proper regulations and the wise institutional arrangements which will allow the economy to flourish in a more efficient fair and humane way This book is interdisciplinary in nature It is a philosophical and ethical reflection on economics Hence I make use of philosophical ideas often but not exclusively those of Hegel I reflect philosophically on economic concepts

Religion, Spirituality and Everyday Practice Giuseppe Giordan, William H. Swatos, Jr., 2011-08-14 The current generation of young adults at least in the Western world has shown a marked tendency toward a preference for describing themselves as spiritual as contrasted to religious This book seeks to examine the possible meanings and consequences associated with this contrast in terms of the similarities and differences that affect those who use these terms with respect to the everyday practices that they themselves employ or believe should follow from being self-defined as religious or spiritual or not The several chapters in this volume take up the religious-spiritual contrast specifically through investigations into practice In what ways do people who claim to be religious or spiritual define these self-images as manifest in their own lives How on a daily basis does a person who considers himself or herself religious or spiritual live out that self-image in specific ways that she or he can describe to others even if not share with others Are there ways that being spiritual can involve religion or ways that being religious can involve spirituality and if so how do these differ from concepts in prior eras e.g. Ignatian spirituality Orthodox spirituality Anglican spirituality etc We also explore if there are institutions of spiritual practice to which those who term themselves spiritual turn or if the difference implied by these terms may instead be between institutionalized and de-institutionalized expressions of practice including but not limited to self-spiritualities

Meta Medical Ethics Michael A. Grodin, 2001-11-30 What is Bioethics What are its goals and theoretical assumptions Is it a unique discipline Must medical ethics be grounded in clinical experience How can ethical inquiry inform medicine's theory and practice Must one have a definition of medicine before one can have a medical ethic Does medicine have a unique or demarcating body of knowledge methodology or philosophy These troubling questions are addressed by a distinguished roster of philosophers theologians lawyers social scientists physicians and scientists The unifying theme of this text is a

philosophical exploration of the history nature scope and foundations of bioethics There is a critical evaluation of principled communitarian legal narrative and feminist approaches The book s interdisciplinary focus allows for a lively dialogue which includes papers and accompanying commentaries Audience Philosophers of science and medical ethicists physicians lawyers policy makers **Christianizing the Social Order** Walter Rauschenbush ,1913
