The Common Heritage:

The Concept of the Common Heritage of Mankind in International Law Kemal Baslar, 2024-02-06 The concept of the common heritage of mankind is one of the most extraordinary developments in recent intellectual history and one of the most revolutionary and radical legal concepts to have emerged in recent decades The year 1997 marks the thirtieth anniversary of the advent of the concept in the domain of public international law Ever since its emergence it has become evident that no other concept notion principle or doctrine has brought as much intensive debate controversy confrontation and speculation as the common heritage phenomenon did This is because it is a philosophical idea that questions the regimes of globally important resources regardless of their situation and requires major changes in the world to apply its provisions In other words the application and enforcement of the common heritage of mankind require a critical reexamination of many well established principles and doctrines of classical international law such as acquisition of territory consent based sources of international law sovereignty equality resource allocation and international personality This book aims to explore the legal theory and implications of the concept of the common heritage of mankind It addresses almost all aspects of the concept in the light of the experience of three decades The author takes into account the elements of the common heritage concept in the fields of jurisprudence outer space law the law of the sea the law of Antarctica international environmental law human rights and general principles of public international law It tries to develop a normative framework through which the concept may offer alternatives for the governance of the global commons

The Concept of the Common Heritage of Mankind

Vladimir Mikhailovich Postyshev, 1990 **The Common Heritage of Mankind: Then and Now** M.C.W. Pinto, **Cries of the Sea** Peter B. Payoyo, 1997-10-30 A treasure lies at the bottom of the oceans This treasure takes the form of a legal and ethical principle which may illuminate the potential for an enriching international community in a world of growing disparities It is the principle of the Common Heritage of Humanity The 1982 United Nations Convention on Law of the Sea delineated an Area and then proclaimed the Area and its resources the common heritage of mankind The author suggests that the terms common heritage and humanity invite a larger perspective on the law underlying the Convention Cries of the Sea provides a unique view of the deep blue sea through the lens of the politics of international ocean law and policy and in particular through the exposition of the Common Heritage of Humanity as a fundamental principle of international law The book explains why and how the Common Heritage principle constitutes an indispensable ingredient in any global programme for sustainable development Legal philosophers and practitioners alike in the ocean arena and beyond will find that this work offers an intriguing intellectual and moral challenge This book received the first Arvid Pardo Prize for outstanding scholarship on the Law of the Sea The Common Heritage of Mankind and the Developing Law of the Sea Deborah C. Trefts, 1980 The Common Heritage of Mankind: Then and Now (Volume 361), 2013 *The Common Heritage of Mankind* Edward Guntrip, 2001 The Common Heritage Arvid Pardo, 1975 **International Law and the Genetic**

Resources of the Deep Sea David Kenneth Leary, 2007 Deep sea genetic resources and the interest of the biotechnology industry in their exploitation are emerging as a significant challenge for international oceans governance This book is the first comprehensive examination of this issue and explores its relationship with marine scientific research and other activities in the deep sea As well as a detailed survey of the state of industry interest in this new field of biotechnology it also sets out proposals for future sustainable management of these resources utilizing many existing international law and policy regimes

International Law and Corporate Actors in Deep Seabed Mining Joanna Dingwall, 2021-07-08 The deep seabed beyond national jurisdiction known as the Area comprises almost three quarters of the entire surface area of the oceans and is home to an array of prized commodities including valuable metals and rare earth elements In recent years there has been a marked growth in deep seabed investment by private corporate actors and an increasing impetus towards exploitation This book addresses the unresolved legal challenges which this increasing corporate activity will raise over the coming years including in relation to matters of common management benefit sharing marine environmental protection and investment protection Acting under the United Nations Convention on the Law of the Sea UNCLOS the International Seabed Authority is responsible for regulating the Area for the benefit of humanity and granting mining contracts A product of its history the UNCLOS deep seabed regime is an unlikely hybrid of capitalist and communist values embracing the role of private actors while enshrining principles of resource distribution As technological advances begin to outstrip legal developments this book assesses the tension between corporate commercial activity in the Area and the achievement of the common heritage

Global Commons and the Law of the Sea Keyuan Zou, 2018-08-13 Global Commons refers to resource domains or areas that lie outside of the political reach of any one State including sea areas beyond national jurisdiction and Antarctica The concept of global commons is a living concept and can accommodate over time other commons at the international level such as biodiversity and generic resources The outlook for the global marine commons is not encouraging fishery resources continue to deplete marine biodiversity continues to reduce and plastic wastes in the oceans continue to increase In international law there are legal regimes governing global marine commons the most important of which is the 1982 United Nations Convention on the Law of the Sea LOSC Effective as of 1994 LOSC governs the high seas international seabed and its resources marine environmental protection and fisheries Global Commons and the Law of the Sea offers intellectual discussions on global marine commons It contains six parts respectively addressing the principle of the common heritage of mankind CHM freedoms of high seas deep sea mining and international seabed area beyond national jurisdiction ABNJ governance management of geoengineering and generic resources and recent developments in the polar regions *The Law and Politics of Sustainability* Klaus Bosselmann, Daniel S. Fogel, J.B. Ruhl, Patricia Wouters, 2010-11-30 The Law and Politics of Sustainability explores efforts made to address pressing environmental concerns through legislation conventions directives treaties and protocols Articles explain the mechanics of environmental law the concepts that shape sustainable development

case studies and rulings that have set precedents approaches to sustainable development taken by legal systems around the world and more Experts and scholars in the field raise provocative questions about the effectiveness of international law versus national law in protecting the environment and about the effect of current laws on future generations They analyze the successes and shortcomings of present legal instruments corporate and public policies social movements and conceptual strategies offering readers a preview of the steps necessary to develop laws and policies that will promote genuine sustainability

NASA Authorization for Fiscal Year 1980 United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Communications,1979

Art and Cultural Heritage Barbara T. Hoffman,2006 Art and Cultural Heritage is appropriately but not solely about national and international law respecting cultural heritage It is a bubbling cauldron of law mixed with ethics philosophy politics and working principles looking at how cultural heritage law policy and practice should be sculpted from the past as the present becomes the future Art and cultural heritage are two pillars on which a society builds its identity its values its sense of community and the individual The authors explore these demanding concerns untangle basic values and look critically at the conflicts and contradictions in existing art and cultural heritage law and policy in its diverse sectors The rich and provocative contributions collectively provide a reasoned discussion of the issues from a multiplicity of views to permit the reader to understand the theoretical and philosophical underpinnings of the cultural heritage debate

The Law of the Sea and Polar Maritime Delimitation and Jurisdiction Alex G. Oude Elferink,Donald R. Rothwell,2021-10-18 The climate and other characteristics of the polar regions have been major factors in shaping the legal regime applicable to the polar oceans In Antarctica states have had to grapple with the question of how to account for developments in the law of the sea while preserving the compromise over sovereignty contained in the Antarctic Treaty The Arctic also has presented challenges for the law of the sea as illustrated by the continued attention given to special rules for polar shipping The 1982 United Nations Convention on the Law of the Sea has led to substantial agreement on the legal regime of ocean spaces The present volume explores the impact the Convention has had on the polar regions in this respect including after its entry into force in 1994 To this end it looks at a number of issue areas in the field of maritime delimitation baselines maritime zones delimitation of maritime zones between neighboring states and jurisdiction environmental protection navigation and fisheries from a bipolar perspective It is strongly suggested that the legal regime of the polar oceans will be further elaborated to more effectively deal with existing activities or to accommodate new activities It is likely that the United Nations Convention on the Law of the Sea will continue to provide the basic legal framework for this exercise and that states will be careful not to unravel the delicate balance contained in it

Cultural Heritage, Sustainable Development and Human Rights Laura Pineschi,2023-12-04 The importance of cultural heritage in both its tangible and intangible forms to sustainable development and its economic social and environmental components is increasingly evident in the recent practice of intergovernmental and non governmental

organizations at the universal and regional level Due consideration for the integration of the cultural dimension in the implementation of Agenda 2030 has begun to grow in various international fora including initiatives to emphasize the role and contribution of tangible and intangible heritage as drivers and enablers of sustainable development It has also been recognized that the inherent links between cultural heritage and sustainable development cannot be correctly addressed without taking into account their various implications for the effective enjoyment of all human rights including cultural rights This book offers a thorough academic investigation on the importance of cultural heritage to sustainable development and cultural rights from an international law perspective Providing an in depth review of the possible intersections between cultural heritage sustainable development and cultural rights and the limits of the current legal and institutional framework it will be of interest to researchers and scholars of international law cultural heritage law environmental law and human rights law

Hearings, Reports and Prints of the House Committee on International Relations United States. Congress. House. Committee on International Relations,1977 The Moon Treaty United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Science, Technology, and Space,1980 The Protection of General Interests in Contemporary International Law Massimo Iovane,Fulvio M. Palombino,Daniele Amoroso,Giovanni Zarra,2021-08-04 This book analyses three key concepts global public goods global commons and fundamental values as tools geared towards the protection of the general interests of the international community After providing an overview of these concepts the book examines how international law has responded to them in a wide range of fields and investigates how global governance has improved or worsened this response Contributions from a group of experts explore the legal foundations of general interests and discuss which interests have or have not been deemed to deserve the protection of international law Other chapters focus on whether and to what extent it is appropriate that international law intervenes to regulate such interests considering the interplay between multiple actors including states international and regional organisations and non state actors The book explores how states and other actors have used international law to protect general interests what lessons can be learned from these efforts and what significant challenges still need to be addressed *3rd European Conference of Ministers Responsible for the Cultural Heritage* Council of Europe,1993-01-01
