The Citroen:

Citroen Lance Cole, 2014-03-31 In this new view on the Citroen story automotive aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen but the aeronautical and cultural origins that lay behind Citroen's form and function The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history Using interviews translations archive documents and specially commissioned photographs the Citroen journey is cast in a fresh perspective It explains in detail the influences upon Citroen design Voisin Lefebvre Bertoni Boulanger Mages Opron and recent Citroen designers such as Coco Blakeslee and Soubirou As well as all the men of the great period of 1920s 1970s expansion cites less well known names of Citroen's French engineering design and influence such as Cayla Gerin Giret Harmand Dargent and others to give a full picture of Citroen heritage Citroën DS Lance Cole, 2021-08-31 Launched in 1955 yet looking like a sci fi design proposal for a future then undreamed of Flaminio Bertoni's ellipsoid sculpture with wheels that was the Citroën DS stunned the world There was a near riot at the 1955 Paris Motor Show launch of the car orders flooded in for this the new big Citroën a Voiture a Grande Diffusion or VGD as the car that replaced the legendary Traction Avant range The term DS stems from two Citroën parts of nomenclature the type of engine used as the 11D D and the special hemispherical design of the cylinder head as Culasse Special S DS out of Deesse or Goddess was a more popular myth of DS origination but an erroneous one But it was not just the car's aerodynamically advanced body shape Cd 0.37 that framed the genius of the DS hydro pneumatic self levelling suspension advanced plastics and synthetics for the construction of the roof and dashboard fascia and amazing road holding and cabin comfort were some of this car's highlights Only the lack of an advanced new engine was deemed a missed opportunity In fact Citroën had created a new engine for the car but lacked the resources to produce it in time for 1955 DS was a major moment in the history of car design one so advanced that it would take other auto manufacturers years to embrace Yet DS in its aero design was the precursor to today's low drag cars of curved form Manufactured worldwide used by presidents leaders diplomats farmers and many types of people the DS redefined Citroën its engineering and design language and its brand for decades to come Prone to rust not the safest car in the world and always lacking a smoother powerplant the DS still became an icon of car design Reshaped with a new nose and faired in headlamps in 1967 DS remained in production until 1975 Across its life DS spawned an estate car variant as the Safari a range of limousines two door convertibles and even coach built coupes and rally specials This car was a product design that became an article of social science it was that famous and it defined a European design movement upon a global stage then packed with me too copyist designs The DS or Goddess as it was tagged was a tear drop shaped act of French confidence in a world of the regurgitation of the known Some argue that DS and its effect has never been surpassed This new value for money book provides innovative access to the design history and modeling of the revolutionary DS one of the true greats of motoring history and a contemporary classic car of huge popularity **La France**
