Contemporary British Women Writers Emma Parker, 2004 Essays illustrating the range and diversity of post 1970 British women writers Despite the enduring popularity of contemporary women's writing British women writers have received scant critical attention They tend to be overshadowed by their American counterparts in the media and have come to be represented within the academy almost exclusively by Angela Carter and Jeanette Winterson This collection celebrates the range and diversity of contemporary post 1970 British women writers It challenges misconceptions about the nature and scope of fiction by women

writers working in Britain commonly dismissed as parochial insular dreary and domestic and seeks to expand conventional definitions of British by exploring how issues of nationality intersect with gender class race and sexuality Writers covered include Pat Barker A L Kennedy Maggie Gee Rukhsana Ahmad Joan Riley Jennifer Johnston Ellen Galford Susan Hill Fay Weldon Emma Tennant and Helen Fielding Contributors DAVID ELLIS CLARE HANSON MAROULA JOANNOU PAULINA PALMER EMMA PARKER FELICITY ROSSLYN CHRISTIANE SCHLOTE JOHN SEARS ELUNED SUMMERS BREMNER IMELDA WHELEHAN GINA WISKER The Place of Ethics in Science Education Amanda McCrory, Michael J.

Reiss, 2023-08-24 Science education particularly school science education has long had an uneasy relationship with ethics being unsure whether to embrace ethics or leave it to others In this book the authors argue that while the methods of science and of ethics are very different ethics plays a key role in how science is undertaken and used And so ethics has a central place in science education whether we are talking of school science education for students of all ages or the informal science education that takes place in through internet books magazines TV and radio or in places such as hospitals and zoos Written for science educators based in schools and elsewhere the authors make no assumptions that the reader has any knowledge of ethics beyond the background understandings of morality that virtually all of us have Empowered with the knowledge shared in this book readers will feel confident about the place that ethics has in science education The authors provide a rich array of examples as to how science education both in school and out of school and for all ages can be enhanced through including teaching about ethics *Liminal Discourses* Daniela Carpi, Jeanne Gaakeer, 2013-03-22 The past few decades in legal and literary studies have challenged the boundaries raised by the different concepts of law and literature espoused by a great variety of theorists Law s traditionally assumed disciplinary autonomy has been challenged by those who have pursued interdisciplinary methods of research In particular the concept of the sublime has moved out of the strictly philosophical and literary fields and crossed the borders between disciplines finding an application also in the juridical field On one hand this volume proposes that the ethical aspect involved in the legal sublime is to contain the arrogance of the law On the other hand the volume draws attention to the and of interdisciplinary literary legal studies and offers new daring comparisons between philosophical fields and between apparently distant historical periods
