The Image of Georgian Bath 1700-2000
Peter Borsay, 2000-07-06 This interdisciplinary study explores the evolution, structure and uses of the image of Georgian Bath from its genesis in the eighteenth century to its renaissance in the twentieth century. In recent decades there has been both a popular resurgence of interest in heritage and tradition and a growing academic awareness of the power of imagery in shaping the lives of individuals and societies. There is perhaps no city in Britain so saturated in history and layered with historic imagery as Bath. It therefore provides an ideal case study to investigate the dynamic fusion and impact of the forces of past and representation. The dominant perception of Bath today is that of a classical and particularly Georgian city. In this stimulating and scholarly study, Peter Borsay examines the construction and development of this image. Its principal components, biography and architecture, are explored together with the media through which it was constructed and transmitted, as well as its commercial, social, political and psychological uses. Dr Borsay concludes by relating the findings for Bath to current debates on towns, heritage and the nature of history.

The Return of Curiosity Nicholas Thomas, 2016-08-15
The Spy Museum, the Vacuum Cleaner Museum, the National Mustard Museum, not to mention the Art Institute, the Museum of Modern Art and the Getty Center: museums have never been more robust. Curating just about everything there is and assuming a new prominence in public life, *The Return of Curiosity* explores museums in the modern age, offering a fresh perspective on some of our most important cultural institutions and the vital function they serve as stewards of human and natural history. Reflecting on art galleries, science and history institutions and collections all around the world, Nicholas Thomas argues that in times marked by incredible insecurity and turbulence, museums help us sustain and enrich society. Moreover, they stimulate us to think in new ways about our world, compelling our curiosity and showing us the importance of understanding one another. Thomas looks at museums not simply as storehouses of old things but as the products of meaningful relationships between curators, the public, history and culture. These relationships, he shows, don't always go smoothly but they do always offer new insights into the many ways we value and try to preserve the world we live in. The result is a refreshing and hopeful look at museums as a cultural force, one that by gathering together paintings, tropical birds, antiques or even our own bodies, offers an illuminating reflection of who we are.

The Future of Museum and Gallery Design Suzanne MacLeod, Tricia Austin, Jonathan Hale, Oscar Ho Hing-Kay, 2018-06-18
The Future of Museum and Gallery Design explores new research and practice in museum design. Placing a specific emphasis on social responsibility in its

broadest sense the book emphasises the need for a greater understanding of the impact of museum design in the experiences of visitors in the manifestation of the vision and values of museums and galleries and in the shaping of civic spaces for culture in our shared social world The chapters included in the book propose a number of innovative approaches to museum design and museum design research Collectively contributors plead for more open and creative ways of making museums and ask that museums recognize design as a resource to be harnessed towards a form of museum making that is culturally located and makes a significant contribution to our personal social environmental and economic sustainability Such an approach demands new ways of conceptualizing museum and gallery design new ways of acknowledging the potential of design and new experimental and research led approaches to the shaping of cultural institutions internationally The Future of Museum and Gallery Design should be of great interest to academics and postgraduate students in the fields of museum studies gallery studies and heritage studies as well as architecture and design who are interested in understanding more about design as a resource in museums It should also be of great interest to museum and design practitioners and museum leaders
