The Colorado Plateau II Biophysical Socioeconomic And Culture Research:

The Colorado Plateau II Charles Van Riper, David John Mattson, 2005 The publication of The Colorado Plateau Cultural Biological and Physical Research in 2004 marked a timely summation of current research in the Four Corners states This new volume derived from the seventh Biennial Conference on the Colorado Plateau in 2003 complements the previous book by focusing on the integration of science into resource management issues The 32 chapters range in content from measuring human impacts on cultural resources through grazing and the wildland urban interface issues to parameters of climate change on the Plateau The book also introduces economic perspectives by considering shifting patterns and regional disparities in the Colorado Plateau economy A series of chapters on mountain lions explores the human wildland interface These chapters deal with the entire spectrum of challenges associated with managing this large mammal species in Arizona and on the Colorado Plateau conveying a wealth of timely information of interest to wildlife managers and enthusiasts Another provocative set of chapters on biophysical resources explores the management of forest restoration from the micro scale all the way up to large scale GIS analyses of ponderosa pine ecosystems on the Colorado Plateau Given recent concerns for forest health in the wake of fires severe drought and bark beetle infestation these chapters will prove enlightening for forest service park service and land management professionals at both the federal and state level as well as general readers interested in how forest management practices will ultimately affect their recreation activities With broad coverage that touches on topics as diverse as movement patterns of rattlesnakes calculating watersheds and rescuing looted rockshelters this volume stands as a compendium of cutting edge research on the Colorado Plateau that offers a wealth of insights for many scholars

The Colorado Plateau IV Charles Van Riper, Brian F. Wakeling, Thomas D. Sisk, 2010 Roughly centered on the Four Corners region of the southwestern United States the Colorado Plateau covers some 130 000 square miles of sparsely vegetated plateaus mesas canyons arches and cliffs in Arizona Utah Colorado and New Mexico With elevations ranging from 3 000 to 14 000 feet the natural systems found within the plateau are dramatically varied from desert to alpine conditions This book focuses on the integration of science and resource management issues in this unique and highly varied environment Broken into three subsections this volume addresses conservation biology biophysical resources and inventory and monitoring concerns The chapters range in content addressing conservation issues past present and future on the Colorado Plateau measurement of human impacts on resources grazing and wildland urban interfaces and tools and methods for monitoring habitats and species An informative read for people interested in the conservation and natural history of the region the book will also serve as a valuable reference for those people engaged in the management of cultural and biological resources of the Colorado Plateau as well as scientists interested in methods and tools for land and resource management throughout the West

Grand Canyon National Park (N.P.), Fire Management Plan, 2009 [Vegetation Dynamics on the Mountains and Plateaus of the American Southwest](#) John Vankat, 2013-05-27 The book provides information essential for

anyone interested in the ecology of the American Southwest including land managers environmental planners conservationists ecologists and students It is unique in its coverage of the hows and whys of dynamics changes in the major types of vegetation occurring on southwestern mountains and plateaus It explains the drivers and processes of change describes historical changes and provides conceptual models that diagrammatically illustrate past present and potential future changes All major types of vegetation are covered spruce fir mixed conifer and ponderosa pine forests pinyon juniper vegetation subalpine montane grassland and Gambel oak and interior chaparral shrublands The focus is on vegetation that is relatively undisturbed i e in natural and near natural condition and how it responds to natural disturbances such as fire and drought as well as to anthropogenic disturbances such as fire exclusion and invasive species

The Colorado Plateau VI Laura Foster Huenneke, Charles van Riper, Kelley Ann Hays-Gilpin, 2015-06-18 With a plethora of updates and insights into land conservation and management questions on the Colorado Plateau The Colorado Plateau VI shows how new technologies for monitoring spatial analysis restoration and collaboration improve our understanding management and conservation of outcomes at the appropriate landscape scale for the Colorado Plateau Provided by publisher Colorado Plateau 3 Charles Van Riper, Mark K. Sogge, 2008 Roughly centered on the Four Corners region of the southwestern United States the Colorado Plateau covers an area of 130 000 square miles The relatively high semi arid province boasts nine national parks sixteen national monuments many state parks and dozens of wilderness areas With the highest concentration of parklands in North America and unique geological and ecological features the area is of particular interest to researchers Derived from the Eighth Biennial Conference of Research on the Colorado Plateau this third volume in a series of research on the Colorado Plateau expands upon the previous two books This volume focuses on the integration of science into resource management issues summarizes what criteria make a successful collaborative effort outlines land management concerns about drought provides summaries of current biological sociological and archaeological research and highlights current environmental issues in the Four Corner States of Arizona New Mexico Colorado and Utah With broad coverage that touches on topics as diverse as historical aspects of pronghorn antelope movement patterns through calculating watershed prescriptions to the role of wind blown sand in preserving archaeological sites on the Colorado River this volume stands as a compendium of cuttingedge management oriented research on the Colorado Plateau The book also introduces for the first time tools that can be used to assist with collaboration efforts among landowners and managers who wish to work together toward preserving resources on the Colorado Plateau and offers a wealth of insights into land management questions for many readers especially people interested in the natural history biology anthropology wildlife and cultural management issues of the region

Participatory Research in Conservation and Rural Livelihoods Louise Fortmann, 2009-03-12 Participatory Research in Conservation and Rural Livelihoods Doing Science Together starts from the understanding that all people create knowledge and that the creation of sustainable livelihoods and of conditions that protect and sustain rural ecosystems are interrelated

Here local experts and professional researchers write independently about the participatory research processes through which they created new knowledge together. They demonstrate that interdependent science can produce more accurate and locally appropriate data while frankly addressing persisting issues such as unequal power whose knowledge and what ways of knowing count whose voice can be heard or appear in print and other dilemmas of this practice. Conservation scientists and practitioners will both benefit from reading this book. First book to examine community participatory research techniques that focuses on conservation aims. Unique book in that it is written from the perspective of participating community volunteers and researching scientists. Part of the prestigious Conservation Science and Practices series published in association with the Zoological Society of London. Participatory Research in Conservation and Rural Livelihoods is brilliant, passionate and inspiring. Richa Nagar, University of Minnesota, co-author of *Playing with Fire*. Archaeological Variability and Interpretation in Global Perspective Alan P. Sullivan, Deborah Irene Olszewski, 2016-12-01. In *Archaeological Variability and Interpretation in Global Perspective*, contributors illustrate the virtues of various ecological, experimental, statistical, typological, technological, and cognitive social approaches for understanding the origins, formation, histories, and inferential potential of a wide range of archaeological phenomena. As archaeologists worldwide create theoretically inspired and methodologically robust narratives of the cultural past, their research pivots on the principle that determining the origins and histories of archaeological phenomena is essential in understanding their relevance for a variety of anthropological problems. The chapters explore how the analysis of artifact assemblage and site distributions at different spatial and temporal scales provides new insights into how mobility strategies affect lithic assemblage composition, what causes unstable interaction patterns in complex societies, and which factors promote a sense of place in landscapes of abandoned structures. In addition, several chapters illustrate how new theoretical approaches and innovative methods promote reinterpretations of the regional significance of historically important archaeological sites such as Myrtos Pyrgos, Crete, Greece; Aztalan, Wisconsin, USA; Tabun Cave, Israel; and Casas Grandes, Chihuahua, Mexico. The studies presented in *Archaeological Variability and Interpretation in Global Perspective* challenge orthodoxy, raise research-worthy controversies, and develop strong inferences about the diverse evolutionary pathways of humankind using theoretical perspectives that consider both new information and preexisting archaeological data. Kamp, Sam Lin, Emilia Oddo, Zeljko Rezek, Julien Riel, Salvatore Gary O. Rollefson, Jeffrey Rosenthal, Barbara J. Roth, Sissel Schroeder, Justin I. Shiner, John C. Whittaker, David R. Wilcox. *Tamarix* Anna Sher, Martin F. Quigley, 2013-03-21. Few plant species have had as much combined scientific, public, and political attention as exotic *Tamarix* spp. (tamarisk, saltcedar). 24 essays by 44 authors explore its biology, ecology, politics, history, and management, reflecting the controversy that has arisen around its invasion and what should or should not be done.

Wildfire Risk Wade E. Martin, Carol Raish, Brian Kent, 2010-09-30. The continuing encroachment of human settlements

into fire prone areas and extreme fire seasons in recent years make it urgent that we better understand both the physical and human dimensions of managing the risk from wildfire Wildfire Risk follows from our awareness that increasing public knowledge about wildfire hazard does not necessarily lead to appropriate risk reduction behavior Drawing heavily upon health and risk communication and risk modeling the authors advance our understanding of how individuals and communities respond to wildfire hazard They present results of original research on the social economic and psychological factors in responses to risk discuss how outreach and education can influence behavior and consider differences among ethnic racial groups and between genders with regard to values views and attitudes about wildfire risk They explore the role of public participation in risk assessment and mitigation as well as in planning for evacuation and recovery after fire Wildfire Risk concludes with a dedicated section on risk modeling with perspectives from decision sciences geography operations research psychology experimental economics and other social sciences

Forest Landscape Ecology Ajith H. Perera, Lisa J. Buse, Thomas Crow, 2007-03-14 Landscape ecology has generated a wealth of knowledge that could enhance forest policy but little of this knowledge has found its way into practice This the first book to introduce landscape ecologists to the discipline of knowledge transfer The book considers knowledge transfer in general critically examines aspects that are unique to forest landscape ecology and reviews case studies of successful applications for policy developers and forest managers in North America
