The Coming Credit Collapse:

The Coming Bond Market Collapse Michael G. Pento, 2013-03-28 The coming financial apocalypse and what government and individuals can do to insulate themselves against the worst shocks In this controversial book a noted adherent of Austrian School of Economics theories advances the thesis that the United States is fast approaching the end stage of the biggest asset bubble in history He describes how the bursting of the bubble will cause a massive interest rate shock that will send the US consumer economy and the US government pumped up by massive Treasury debt into bankruptcy an event that will send shockwaves throughout the global economy Michael Pento examines how policies followed by both the Federal Reserve and private industry have contributed to the impending interest rate disaster and highlights the similarities between the US and European debt crisis But the book isn't all doom and gloom Pento also provides well reasoned solutions that government industry and individuals can take to insulate themselves against the coming crisis Paints an alarmingly vivid picture of the massive interest rate shock which soon will send consumers and the government into bankruptcy Backed by a wealth of historical and economic data Pento explains how the bubble was created and what the U S can do to mitigate the impending crisis Provides investors with sound strategies for protecting themselves and their assets against the coming financial apocalypse Explains why retirees in particular will be at risk as real estate prices decline pensions weaken and the bond bubble bursts

1772 3 financial crisis was an important historical episode in its own right taking place during a pivotal period in the development of financial capitalism and coinciding with the start of the traditional industrialisation narrative It was also one of the earliest purely financial crises occurring in peacetime and its progress showed an impressive geographical reach involving England Scotland the Netherlands and the North American colonies This book uses a variety of previously unpublished archival sources to question the bubble narrative usually associated with this crisis and to identify the mechanisms of financial contagion that allowed the failure of a small private bank in London to cause rapid and severe distress throughout the 18th century financial system It re examines the short and turbulent career of the Ayr Bank and concludes that its failure was the result of cavalier liability management akin to that of Northern Rock in 2007 rather than the poor asset quality alleged in existing literature It furthermore argues that the Bank of England's prompt efforts to contain the crisis are evidence of a Lender of Last Resort in action some thirty years before the classical formulation of the concept by Henry Thornton
