The Command Of The Air:

The Command of the Air Giulio Douhet, 1983 This reprint of the 1942 English translation of Douhet's works while titled Command of the Air actually consists of five separate works the original 1921 edition of Command of the Air a second edition of 1927 a 1928 monograph titled Probable Aspects of Future War a polemical article of 1929 called Recapitulation and the 1930 study The War of 1919 The volume is reprinted by the Office of Air Force History as part of Project Warrior By transporting ourselves back to the 1920s past not only the Vietnam and Korean Wars but nearly two decades before World War II we become silent observers of the unfolding drama of airpower's history Knowing that transpired after Douhet wrote we can test our understanding find the assumptions and conclusions of Douhet that proved false and read with wonder those that proved true Some of what he wrote today seems almost timeless principles perhaps of the employment of aircraft in war Giulio Douhet was a prophet From the perspective of today he still bears pondering Serious thinking about the nature of war and the role of aerospace power will not in our lifetime cease to be of value Abstract

Command Of The Air General Giulio Douhet, 2014-08-15 In the pantheon of air power spokesmen Giulio Douhet holds center stage His writings more often cited than perhaps actually read appear as excerpts and aphorisms in the writings of numerous other air power spokesmen advocates and critics Though a highly controversial figure the very controversy that surrounds him offers to us a testimonial of the value and depth of his work and the need for airmen today to become familiar with his thought The progressive development of air power to the point where today it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact in many ways the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision Douhet together with Hugh Boom Trenchard of Great Britain and William Billy Mitchell of the United States is justly recognized as one of the three great spokesmen of the early air power era This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book published in 1921 Readers may well find much that they disagree with in this book but also much that is of enduring value The vital necessity of Douhet's central vision that command of the air is all important in modern warfare has been proven throughout the history of wars in this century from the fighting over the Somme to the air war over Kuwait and Iraq
