How scientists saved humanity from the deadliest infectious diseases and what we can do to prepare ourselves for future epidemics. After the unprecedented events of the COVID 19 pandemic it may be hard to imagine a time not so long ago when deadly diseases were a routine part of life. It is harder still to fathom that the best medical thinking at that time blamed these diseases on noxious miasmas bodily humors and divine dyspepsia. This all began to change on a day in April 1676 when a little known Dutch merchant described bacteria for the first time. Beginning on that day in Delft and ending on the day in 1978 when the smallpox virus claimed its last known victim. *Ending Epidemics* explains how we came to understand and prevent many of our worst infectious diseases and double average life expectancy. *Ending Epidemics* tells the story behind the mortality revolution the dramatic transformation not just in our longevity but in the character of childhood family life and human society. Richard Conniff recounts the moments of inspiration and innovation decades of dogged persistence and of course periods of terrible suffering that stir individuals institutions and governments to act in the name of public health. Stars of medical science feature in this drama but lesser known figures also play a critical role. And while the history of germ theory is central to this story *Ending Epidemics* also describes the importance of everything from sanitation improvements and the discovery of antibiotics to the development of the microscope and the syringe technologies we now take for granted. **Notes and Records of the Royal Society of London** Royal Society (Great Britain), 1988. *How to Speak Whale* Tom Mustill, 2022-09-06. **Alle de brieven van Antoni van Leeuwenhoek: 1695-1696** Antoni van Leeuwenhoek,1983 [A Catalogue of the Manuscripts of Christiaan Huygens including a concordance with his Oeuvres Complètes](#) Joella Yoder,2013-05-13 A Catalogue of the Manuscripts of Christiaan Huygens inventories all known manuscripts written by Christiaan Huygens as well as all letters to or from him Because almost all of the manuscripts are housed at the University of Leiden in a collection

entitled *Codices Hugeniani* the catalogue contains an inventory of that entire collection of family papers including many involving Constantijn Huygens In addition because most scholars begin their research by consulting *Oeuvres Complètes de Christiaan Huygens* which does not provide enough information to relocate the manuscripts edited therein this catalogue essentially footnotes every edited piece by listing the source manuscripts page by page for each volume Thus the researcher should be able to move easily between manuscript and edition
