Understanding Color in Photography Bryan Peterson, Susana Heide Schellenberg, 2017-08-29 Veteran photographer and instructor Bryan Peterson is best known for his arresting imagery using bold graphic color and composition. Here he explores his signature use of color in photography for the first time, showing readers his process for creating striking images that pop off the page. He addresses how to shoot in any type of light and looks at color families and how they can work together to make compelling images in commercial and art photography. He also helps readers understand exposure, flash, and other stumbling blocks that beginning and experienced photographers encounter when capturing images, showing how to get the most out of any composition. With its down-to-earth voice and casual teaching style, *Understanding Color in Photography* is a workshop in a book helping any photographer take their images to the next level. **The Color Photo Book** Andreas Feininger, 1969

Twentieth-century Color Photographs Sylvie Pénichon, 2013 This book will interest instructors and students in classroom settings, conservators, registrars, curators, archivists, and collection caretakers, and anyone else concerned with the long-term preservation of color photographs. With the advent of digital imaging, the era of traditional color photography is coming to an end. Yet more than 150 years after the invention of color photography, museums, archives, and personal collections are full of images to be cherished, studied, and preserved. These photographs, often made with processes and materials no longer used or easily identified, constitute an important part of the cultural and artistic heritage of the

twentieth century Today it is more important than ever to capture the technical understanding of the processes that created these irreplaceable images In providing an accessible overview of the history and technology of the major traditional color photographic processes this abundantly illustrated volume promises to become the standard reference in its field Following an introductory chapter on color photography in the nineteenth century seven uniformly structured chapters discuss the most commercially or historically significant processes of the twentieth century additive color screen pigment dye imbibition dye coupling dye destruction dye diffusion and dye mordanting and silver toning offering readers a user friendly guide to materials methods of identification and common kinds of deterioration A final chapter presents specific guidelines for collection management storage and preservation There is also a glossary of technical terms along with appendixes presenting detailed chronologies for Kodachrome and Ektachrome transparencies Cibachrome Ilfochrome printing materials and Instant films
