The Coming Convergence Of World Religions:

The Coming Convergence of World Religions Robley Edward Whitson, 1992-01-01 We have says Father Whitson moved across the threshold into a new situation in religion No longer is the quest for unity primarily the concern of historians social theorists and those who generally felt themselves to be outside the commitment to one of the traditions The quest for unity at long last involves those with a specific religious identity and hence enters the very substance of religious experience both individual and communally shared Even though a concern still limited to a very few the explosion in communications and the revolution in education are even now multiplying the effect of these few astronomically The question before us he continues then is not whether the world s religious traditions have a positive significance for one another but rather how we can formulate an understanding of that significance The formulation we seek must arise from within actual religious experience and be capable of speaking to one who listens from within a tradition of sharing specific historic forms of experience It must not presume that the process towards unity will destroy the various traditions reducing them to some common indeterminate kind of religious experience On the contrary to be authentic it must recognize and prize the very different heritages for we can now see that each at its core is unique Sometimes the differing traditions originating in isolation from each other and so coming to their present maturity separately are to become dimensions of one another complementing each other by their varied uniqueness and making possible an undreamed of breadth and depth of vision for man in an infinite universe The

Coming Convergence of World Religions Robley Edward Whitson, 1971 **The Phenomenon of Teilhard** David H. Lane, 1996 New Age writer of the popular Aquarian Conspiracy Marilyn Ferguson observed that many of the leading lights of the New Age movement claim Teilhard as one of the most influential persons in their lives Other influences acknowledged include C G Jung Aldous Huxley Swami Muktananda Thomas Merton Werner Erhard and Maharishi Yogi Indeed of the 185 New Age leaders surveyed Teilhard was the most frequently mentioned of any person who had most influenced their thinking If this is the case then if we are to understand the New Age movement properly it behooves us to take a careful and critical look at Teilhard de Chardin David Lane has done precisely this in a clear well documented and penetrating way In this crucial book David Lane lays bare the philosophical theological and scientific failures of Teilhard s New Age enterprise In a highly documented and insightful scrutiny of Teilhard s cosmic evolution Lane unveils the apostate Christian roots of one of the most important forerunners of the New Age movement This is one of the most significant and serious treatments of the modern roots of the New Age in print **World Faiths** S.A. Nigosian, 2015-12-30 World Faiths is a brief introduction to the major world religions The book provides detailed coverage of the historical development of different religious traditions and for each religion presents issues of faith from the perspective of the believer *Teilhard De Chardin and Eastern Religions* U. The Trinity in History Robert M. Doran, 2012-01-01 The Trinity in History is the first volume in a new series by Robert M Doran that uses the thought of Bernard Lonergan to develop a unified field structure for systematic work in theology Building on his successful and thought provoking Theology and the Dialectics of History and What Is Systematic Theology Doran works out a starting point for a contemporary theology of history and proposes a new application of the psychological analogy for understanding the Christian doctrine of the Trinity Advancing the work of Lonergan Augustine and Thomas Aquinas The Trinity in History also enters into conversation with contemporary philosophical emphases especially with the mimetic theory of noted anthropological philosopher Ren Girard Doran suggests several refinements of Lonergan's notion of functional specialization developing a perspective for including the data of various religious traditions in theological construction and establishing this theory's relevance for contemporary interreligious dialogue
