John Dewey and the Habits of Ethical Life Jason Kosnoski, 2010-09-23 This book uses John Dewey to articulate discursive practices that would help citizens form better intellectual and moral relationships with their fragmented shifting political environment These practices do not impart more or better information to citizens but instead consist in dialog exhibiting rhythms and patterns that increase their interest in inquiring how distant events and communities affect their individual lives The basis for these practices can be found in Dewey's claim that teachers can lead class discussions with particular aesthetic qualities that encourage students to expand the scale of the realm of events that they deem important to their lives The ability to forge moral and intellectual links with distant political events becomes all the more necessary in our current environment not only are individuals lives increasingly affected by global

events but also such events constantly shift across an increasingly liquid social landscape comprised of decentralized institutions instantaneous communication and easy transportation Dewey saw early on how such aesthetics of society or its spatial and temporal qualities might undermine citizens understanding and concern for the larger public This concern for how the movement and location of elements of the social environment might affect citizen perception ties Dewey to many contemporary geographers economists and social theorists normally not associated with his work If Dewey s classrooms were to be reinterpreted as political associations and his teachers as organizers individuals discussing the origins of their seemingly local issues in such associations could forge passionate moral connections with the contemporary liquid public Subsequently they might begin to increasingly care for participate in global politics and seek solidarity with seemingly distant communities

Diagnosis as Cultural Practice Judith Felson Duchan, Dana Kovarsky, 2009-02-26 This book is about the doing and experiencing of diagnosis in everyday life Diagnoses are revealed as interactive negotiations rather than as the assigning of diagnostic labels The authors demonstrate through detailed discourse analyses how the diagnostic process depends on power and accountability as expressed through the talk of those engaged in the diagnostic process The authors also show that diagnostic decisions are not only made by professional experts trained in the art and science of diagnosis but they can also be made by anyone trying to figure out the nature of everyday problems Finally diagnostic reasoning is found to extend beyond typical diagnostic situations occurring in unexpected places such as written letters of recommendation and talk about the nature of communication Together the chapters in this book demonstrate how diagnosis is a communication practice deeply rooted in our culture The book is interdisciplinary and unusually broad in its focus The authors come from different experiential scholarly backgrounds Each of them takes a different look at the impact and nature of the diagnostic process The diagnoses discussed include autism Alzheimer s disease speech and language disorders and menopause The focus is not only on the here and now of the diagnostic interaction but also on how diagnoses and diagnostic processes change over time The book can serve as an undergraduate or graduate text for courses offered in various disciplines including communication sociology anthropology communication disorders audiology linguistics medicine and disability studies
