Situationbound Utterances In L1 And L2:

Situation-Bound Utterances in L1 and L2 Istvan Kecskes, 2012-10-24 This book focuses on a particular type of formulaic expressions called Situation Bound Utterances SBUs. Since the meaning of these pragmatic units is shaped by the interplay of linguistic and extralinguistic factors, they can be best accounted for in a theoretical framework which represents a knowledge for use conception. A unique feature of the book is that it examines the development and use of a particular type of formulae from new perspectives. The comparison of a monolingual and multilingual approach and the application of the graded salience hypothesis to SBUs within a cognitive pragmatic theoretical framework reveal that issues such as the role of context in shaping situational meaning and the existence of common or similar cognitive mechanisms and knowledge structures responsible for cognitive functions and speech behavior in different languages need revision. As a consequence, the book seeks answer to two main questions: 1. origin and extent of context sensitivity and 2. the development of the particular situational functions of SBUs. On the basis of recent research, it is argued that context affects comprehension only after highly salient information has been accessed. Search for the appropriate meaning stops if the information accessed initially is compatible with the context and it continues if it is not. This approach puts the issue of context sensitivity of SBUs into an entirely different perspective. It is also discussed that why exactly these utterances started to be used to express those pragmatic functions and not others. SBUs demonstrate better than any other linguistic unit that there is a strong cognitive linguistic interdependency. The development of certain SBUs can be accounted for through cognitive mechanisms and vice versa. Learning an SBU for a culturally important category can linguistically reinforce the learning of the category itself. The book uses a cross linguistic perspective and illustrative examples from several languages which makes its arguments and claims convincing.

The Socio-Cognitive Approach to Communication and Pragmatics Istvan Kecskes, 2023-12-07 The book aims to serve as a theoretical framework for the socio cognitive approach SCA that is an alternative to the two main lines of pragmatics research: linguistic philosophical pragmatics and sociocultural interactional pragmatics. SCA broadens the scope of the field with an intent to incorporate not only L1 communication but also intercultural communication and communication in a second language. The author integrates the pragmatic view of cooperation and the cognitive view of egocentrism and emphasizes that both cooperation and egocentrism are manifested in all phases of communication albeit to varying extents. SCA places equal importance on the social and cognitive individual factors in pragmatics. The author claims that while social cooperation is an intention directed practice that is governed by relevance, individual egocentrism is an attention oriented trait dominated by salience. The book serves as a theoretical guide for researchers and students who would like to understand how we need to change first language based theories to make sense of what happens not only in L1 but also in intercultural and multi lingual interactions.

The Handbook of Cultural Linguistics Alireza Korangy, 2024-05-31 Bringing together a wide selection of work on cultural linguistics and pragmatics, this comprehensive handbook offers global comparative insights into

the field Diversity does not always imply differences but it also offers insights into surprising similarities and parallels when it comes to expressions By the same token this collection shows that when we see that linguistic differences when they exist stem from not merely language but from the cultural and historical context that cultivates and nurtures them Within that paradigm then this handbook locates the importance of philosophy religion or even the lack thereof political affiliations and so on in forming expressions In addition comparisons with other models of cultural linguistics are undertaken These trends provide readers with a comprehensive introduction to issues in cultural linguistics addressing the peculiarities of the field under the rubric of localized studies and speaking to the possibilities that exist in interpretation of what metaphors are The book highlights the complexities that are so tightly interwoven into the fabric of every word and a sentence across cultures and linguistic traditions A must have collection for anthropologists philosophers linguists philologists theoreticians

EFL Learners Vincent X. Wang, 2011-05-10 Requests a speech act people frequently use to perform everyday social interactions have attracted particular attention in politeness theories pragmatics and second language acquisition This book looks at request behaviours in a significant EFL population Chinese speaking learners of English It will draw on recent literature such as politeness theories and cognitive models for interlanguage pragmatics development as well as placing special emphasis on situational context and formulaic language to provide a more fine grained investigation A range of request scenarios has been specifically designed for this project from common service encounters to highly face threatening situations such as borrowing money and asking a favour of police officer Our findings on Chinese style pragmatic behaviours and patterns of pragmatic development will be of value to cross cultural pragmatics researchers TESOL professionals and university students with an interest in this area of study **The Development of Conceptual Socialization in**

International Students Deniz Ortactepe, 2012-11-16 The relationship between language and culture has been the focus of attention in the fields of anthropology applied linguistics sociolinguistics and sociology especially in regard to the acquisition of language and negotiation of identity Schieffelin and Ochs 1986 framework of language socialization in this respect has inspired a variety of research each of which approaches individuals socialization processes from a different perspective Second language L2 acquisition research has also benefited from this framework to explore L2 learners linguistic and social development in the target language culture This volume offers a new perspective to analyze L2 socialization Since adult L2 learners have already acquired the norms and values of their native culture through first language socialization Kecskes 2002 Matsumura 2001 their experience with the L2 leads to conceptual blending and restructuring of what they already have Therefore the present book talks about conceptual socialization Kecskes 2002 a theoretical framework that is proposed in this study to refer to the process that L2 learners go through in becoming members of the target language community The aim of the study presented in this volume is to explore the process of conceptual socialization by investigating its impact on

international students social and linguistic development Both qualitative and quantitative methods were used to identify and explore the changes in the students social and linguistic repertoire While there is a plethora of research on English as second language learners and short term study abroad students within the field of applied linguistics and interlanguage pragmatics the trajectories of long term international students who pursue graduate degrees abroad remain untold Considering the increasing number of international students in the US and the challenges awaiting them in the new sociocultural environment this volume plays a substantial role in exploring the process that international students go through as a result of their conceptual socialization The findings presented in this book will not only shed light on how international students become socialized into the target culture s linguistic and sociocultural repertoires but will also provide recommendations for the prospective international students so as to facilitate their conceptual socialization process

Cognitive Perspectives on

Bilingualism Monika Reif, Justyna A. Robinson, 2016-04-25 Only 15 years ago bilingualism was somewhat outside the main debates in cognitive linguistics Cognitive linguistics had to a large extent taken for granted the fact that language is embodied in our experience However not much attention was given to questions of whether any changes to our language repertoire alter the way we perceive the world around us A growing body of recent research suggests that one cannot understand the cognitive foundations of language without looking at bi and multilingual speakers In this vein the present book aims to contribute to the existing debate of the relationship between language culture and cognition by assessing differences and similarities between monolingual and bilingual language acquisition and use In particular it investigates the effect of conceptual semantic and pragmatic properties of constructions on code choice and code switching as well as the impact of bilingual and bicultural education on speakers cognitive development This collective volume systematises reviews and promotes a range of theoretical perspectives and research techniques that currently inform work across the disciplines of bilingualism and code switching

Evaluation in Context

Geoff Thompson, Laura Alba-Juez, 2014-02-04 It is now an acknowledged fact in the world of linguistics that the concept of evaluation is crucial and that there is very little if any discourse that cannot be analyzed through the prism of its evaluative content This book presents some of the latest developments in the study of this phenomenon Released more than a decade later than Hunston and Thompson s 2000 *Evaluation in Text* *Evaluation in Context* is designed as its sequel in an attempt to continue update and extend the different avenues of research opened by the earlier work Both theoretical and empirical studies on the topic are presented with the intention of scrutinizing as many of its dimensions as possible by not only looking at evaluative texts but also considering the aspects of the discursive context that affect the final evaluative meaning at both the production and reception stages of the

evaluative act The editors main objective has been to gather contributions which investigate the manifold faces and phases of evaluation by presenting a wide variety of perspectives that include different linguistic theories e g Axiological Semantics Functionalism or Politeness Theory different levels of linguistic description e g phonological lexical or semantic and different text types and contexts e g the evaluation found in ironic discourse the multimodality of media discourse or the world of politics just to name a few The volume can be of use not only for scholars who study the evaluative function of language but also for students who wish to pursue research in the area

Language and Intercultural Communication in the New Era Farzad Sharifian, Maryam Jamarani, 2013-01-04 Studies of intercultural communication in applied linguistics initially focused on miscommunication mainly between native and non native speakers of English The advent of the twenty first century has witnessed however a revolution in the contexts and contents of intercultural communication technological advances such as chat rooms emails personal weblogs Facebook Twitter mobile text messaging on the one hand and the accelerated pace of people s international mobility on the other have given a new meaning to the term intercultural communication Given the remarkable growth in the prevalence of intercultural communication among people from many cultural backgrounds and across many contexts and channels conceptual divides such as native non native are now almost irrelevant This has caused the power attached to English and native speaker like English to lose much of its automatic domination Such developments have provided new opportunities as well as challenges for the study of intercultural communication and its increasingly complex nature This book showcases recent studies in the field in a multitude of contexts to enable a collective effort towards advancements in the area
