## **Sixteen Acres Architecture And The Outrageous Struggle For The Future Of Ground Zero:**

**Sixteen Acres** Philip Nobel, 2005-12-27 Tracing the redevelopment of the World Trade Center site from graveyard to playground for high design insurgent critic Nobel strips away the hyperbole to reveal the secret life including a tally of deceptions and betrayals of the century's most charged building project

**Sixteen Acres** Philip Nobel, 2005

**Sixteen Acres** Philip Nobel, 2025-10-16 A no holds barred look at the collision of interests behind the ambitious attempt to raise a new national icon at Ground Zero When we stand in downtown Manhattan in the future and look up and ask Why Why is it so strange so rude so striving so right so wrong we will have Sixteen Acres to give us the answers Tracing the redevelopment of the World Trade Center site from graveyard to playground for high design insurgent critic Philip Nobel strips away the hyperbole to reveal the secret life of the century's most charged building project Providing a tally of deceptions and betrayals a look at the meaning of events beyond the pieties of the moment and a running bestiary of the main players developers and bureaucrats star architects and amateur fantasists politicians and the well spun press Nobel's book bares the crucial moments as factions and institutions converge to create a noisy new culture at Ground Zero Tragic and comic by turns full of low dealings and high dudgeon Sixteen Acres takes us behind the scenes at a site in search of its sanctity exposing the reconstruction as the flawed product of a complicated city driven by money hamstrung by politics burdened by the wounds it is somehow supposed to heal

**Places in Motion** Jacob N. Kinnard, 2014 Jacob Kinnard offers an in depth examination of the complex dynamics of religiously charged places He argues that places are sacred because we make them sacred and that they remain in perpetual motion transforming themselves from moment to moment and generation to generation

**Constructions** Michael Hensel, Christian Hermansen Cordua, 2015-05-04 The current trend for constructing experimental structures is now an international phenomenon It has been taken up worldwide by design professionals researchers educators and students alike There exist however distinct and significant tendencies within this development that require further investigation This issue of AD takes on this task by examining one of the most promising trajectories in this area the rise of intensely local architectures In his seminal essay of 1983 Kenneth Frampton redefined Critical Regionalism by calling for an intensely local approach to architectural design Today Frampton's legacy is regaining relevance for a specific body of work in practice and education focused on the construction of experimental structures Could this ultimately provide the seeds for a compelling and alternative approach to sustainable design Contributors include Barbara Ascher Peter Buchanan Karl Otto Ellefsen David Jolly Monge Lisbet Harboe David Leatherbarrow Areti Markopoulou Philip Nobel Rodrigo Rubio S ren S S rensen Defne Sunguro lu Hensel Featured practices Renzo Piano Building Workshop Rintala Eggertsson SHoP Studio Mumbai TYIN tegnestue

The Working Landscape Peter F. Cannavo, 2007-06-22 In America today we see rampant development unsustainable resource exploitation and commodification ruin both natural and built landscapes disconnecting us from our surroundings and threatening our fundamental sense of place Meanwhile preservationists often

respond with a counterproductive stance that rejects virtually any change in the landscape In *The Working Landscape* Peter Cannav identifies this zero sum conflict between development and preservation as a major factor behind our contemporary crisis of place Cannav offers practical and theoretical alternatives to this deadlocked polarized politics of place by proposing an approach that embraces both change and stability and unifies democratic and ecological values creating a working landscape Place Cannav argues is not just an object but an essential human practice that involves the physical and conceptual organization of our surroundings into a coherent enduring landscape This practice must balance development which he calls founding and preservation Three case studies illustrate the polarizing development preservation conflict the debate over the logging of old growth forests in the Pacific Northwest the problem of urban sprawl and the redevelopment of the former site of the World Trade Center in New York City Cannav suggests that regional democratic governance is the best framework for integrating development and preservation and he presents specific policy recommendations that aim to create a working landscape in rural suburban and urban areas A postscript on the mass exile displacement and homelessness caused by Hurricane Katrina considers the implications of future climate change for the practice of place

Deforming American Political Thought Michael Shapiro, 2006-10-20 By affirming the relativity of the American historical imagination political theorist Michael J Shapiro offers a powerful polemic against ethnocentric interpretations of American culture and politics *Deforming American Political Thought* analyzes issues that range from the nature of Thomas Jefferson's vision of an egalitarian nation to the persistence of racial inequality Shapiro offers a multifaceted argument that transcends the myopic scope of traditional political discourse *Deforming American Political Thought* illustrates the various ways in which history architecture film music literature and art provide approaches to the comprehension of diverse facets of American political thought from the founding to the present Using these seemingly disparate disciplines as a framework Shapiro paints a picture of American political philosophy that is as distinctive as it is enlightening Shapiro explores the historically vital role of dissenting points of view in American politics and asserts its continuing importance in today's political landscape Exploring such diverse works as slave narratives contemporary films genre fiction and blues and jazz music Shapiro reveals that there have always been dissenting voices casting doubt on the moral purpose and exceptionalism of the American mind An unprecedented inquiry into American politics *Deforming American Political Thought* will surely serve to reinvigorate discussions about the essence of American political thought

exlibris Giovanni Corbellini, 2022-05-18 Architects write a lot especially now when conceptual aspects have become central in the advanced reflections and narrative forms increasingly intersect the quest of design practices for an ultimate legitimation In the growing mass of the publishing offer these keywords try to highlight recurrent issues tracking synthetic paths of orientation between different critical positions with particular attention to what happens in the neighbouring fields of the arts and sciences

SAGE Visual Methods Jason Hughes, 2012-07-23 In contemporary Western societies the visual domain has come to assume a hitherto unprecedented

cultural centrality Daily life is replete with a potentially endless stream of images and other visual messages from the electronic and paper based billboards of the street to the TV and Internet feeds of the home The visual has become imbued with a symbolic potency a signifying power that seemingly eclipses that of all other sensory data The central aim of this four volume collection is to explore key approaches to visual research methods and to consider some of the core principles issues debates and controversies surrounding the use of visual techniques in relation to three key enterprises 1 documentation and representation 2 interpretation and classification and 3 elicitation and collaboration Volume One Principles Issues Debates and Controversies in Visual Research serves as a theoretical backdrop to the field as a whole It introduces core epistemological ethical and methodological debates that effectively cut across the four volume collection as a whole Volume Two Documentation and Representation illustrates approaches to visual documentation and representation from classical documentaries to contemporary state of the art modes of visual anthropology and ethnography Volume Three Interpretation and Classification examines core debates surrounding and approaches to visual analysis Volume Four Elicitation and Collaboration explores participative approaches to visual inquiry

**Minoru Yamasaki and the Fragility of Architecture**

Paul Kidder, 2021-07-18 Few figures in the American arts have stories richer in irony than does architect Minoru Yamasaki While his twin towers of New York's World Trade Center are internationally iconic few who know the icon recognize its architect's name or know much about his portfolio of more than 200 buildings One is tempted to call him America's most famous forgotten architect He was classed in the top tier of his profession in the 1950s and 60s as he carried modernism in novel directions yet today he is best known not for buildings that stand but for two projects that were destroyed under tragic circumstances the twin towers and the Pruitt Igoe housing project in St Louis This book undertakes a reinterpretation of Yamasaki's significance that combines architectural history with the study of his intersection with defining moments of American history and culture The story of the loss and vulnerability of Yamasaki's legacy illustrates the fragility of all architecture in the face of natural and historical forces yet in Yamasaki's view fragility is also a positive quality in architecture the source of its refinement beauty and humanity We learn something essential about architecture when we explore this tension of strength and fragility In the course of interpreting Yamasaki's architecture through the wide lens of the book we see the mid century role of Detroit as an industrial power and architectural mecca we follow a debate over public housing that entailed the creation and eventual destruction of many thousands of units we examine competing attempts to embody democratic ideals in architecture and to represent those ideals in foreign lands we ponder the consequences of anti Japanese prejudice and the masculism of the architectural profession we see Yamasaki's style criticized for its arid minimalism yet equally for its delicacy and charm we observe Yamasaki making a great name for himself in the Arab world but his twin towers ultimately destroyed by Islamic militants As this curious tale of ironies unfolds it invites reflection on the core of modern architecture's search for meaning and on the creative possibilities its legacy continues to

offer Beautifully illustrated with over 100 color illustrations of Yamasaki's buildings this book will be of interest to students academics and professionals in a range of disciplines including architectural history architectural theory architectural preservation and urban design and planning
