Meyers,2010-11-03 *Extreme Environmental Events* is an authoritative single source for understanding and applying the basic tenets of complexity and systems theory as well as the tools and measures for analyzing complex systems to the prediction monitoring and evaluation of major natural phenomena affecting life on earth These phenomena are often highly destructive and include earthquakes tsunamis volcanoes climate change and weather Early warning damage and the immediate response of human populations to these phenomena are also covered from the point of view of complexity and nonlinear systems In 61 authoritative state of the art articles world experts in each field apply such tools and concepts as fractals cellular automata solitons game theory network theory and statistical physics to an understanding of these complex geophysical phenomena **The Naturalists' Leisure Hour and Monthly Bulletin** ,1892 *The Effect of Interactivity in e-Learning Systems* Chris Evans,Luis Palacios,2014-07-18 This book is based on research conducted to investigate whether interactivity yields a learning effect when used appropriately in e Learning Systems and whether this effect enhances learning There is no doubt interactivity is vital in learning This statement is emphasized to such an extent that it is claimed that students with higher levels of interaction will obtain more positive and higher levels of achievement However little scientific evidence can be found to support this relationship The importance of this book is based on the fact that it provides evidence of the impact of interactivity on e Learning Systems considering the three main agents of an educational activity the learner the teacher and the environment In addition the concept of feedback as a key element in any interactive mechanism for enhancing learning is well documented in several studies throughout this book Three empirical studies are presented that investigated interactivity within the educational triangle These three studies were conducted based on the framework of positivism and action

research paradigms The first study entitled Interactive Pedagogical Feedback gathers evidence for how highly interactive pedagogically designed formative feedback enhances students memory and understanding The second study entitled Interactive Audio Feedback examines whether the speed enhancements of oral feedback improve the conditions for the production of the lecturer s feedback and the quality of the feedback delivered to the students The final study Interactive Texting Feedback takes a pedagogical approach to provide formative feedback to a student audience using mobile text messages and determines whether Interactive Texting Feedback enhances the learning experience within the e Learning environment The information contained in the book is useful for academics and institutions to improve their teaching and the efficiency of their learning delivery mechanisms and will guide the design of instructional content It will also be of utility to other researchers and those in roles that require an understanding of interactivity

Campbell,Steven M. Rooney,2018-06-09 This Brief takes the reader on a chemical journey by following the history for over two centuries of how an opiate became an opioid thus spawning an empire and a series of crises These imperfect resemblances of alkaloids are both natural and synthetic substances that particularly in America are continually part of a growing concern about overuse This seemed an inviting prospect for those in pain but as the ubiquitous media coverage continues to lay bare the levels of abuse point to the fact that perhaps an epidemic is upon us if not a culture war Seeking answers to how and why this addiction crisis transpired over two hundred years of long development this Brief examines the role that the chemistry laboratory played in turning patients into consumers By utilizing a host of diverse sources this Brief seeks to trace the design and the production of opioids and their antecedents over the past two centuries From the isolation and development of the first alkaloids with morphine that relieved pain within the home and on the battlefield to the widespread use of nostrums and the addiction crisis that ensued to the dissemination of drugs by what became known as Big Pharma after the World Wars and finally to competition from home made pharmaceuticals the progenitor was always in some form a type of chemistry lab At times the laboratory pressed science to think deeply about society s maladies such as curing disease and alleviating pain in order to look for new opportunities in the name of progress Despite the best intentions opioids have created a paradox of pain as they were manipulated by creating relief with synthetic precision and influencing a dystopian vision Thus influence came in many forms from governments from the medical community and from the entrepreneurial aspirations of the general populace For better but mostly for worse all played a role in changing forever the trajectory of what started with the isolation of a compound in Germany Combining chemistry and history in a rousing new long form narrative that even broadens the definition of a
