you're a seasoned professional this book will provide you with a helpful go-to guide for all senior dog care information that your dog might need in their older years. With recent advances in veterinary medicine, dogs now live much longer lives, meaning that a larger proportion of your dog's life will be spent in its senior years. Older dogs need much different care to younger dogs and are more prone to developing age-related health ailments. With this book, you will learn all about senior dog care, grooming, nutrition, exercise, health problems, the aging process, and when it's time to say goodbye, so you can give your old friend the best loving care in his twilight years. *Old Dog Love* has been compiled and written by veterinarian and author Dr. Jo de Klerk, who has a special interest in pain management. As a result, a large proportion of her clinical cases are aging dogs. She brings her experience into this book, giving plenty of tips and recommendations to improve your dog's quality of life and turn back the clock on your dog's age. After all, age is just a number, not a disease, so even older dogs can live a long, happy, and healthy life.

Kevin Stafford, 2007-06-14 Animal welfare is attracting increasing interest worldwide but particularly from those in developed countries who now have the knowledge and resources to be able to offer the best management systems for their farm animals as well as potentially being able to offer plentiful resources for companion zoo and laboratory animals The increased attention given to farm animal welfare in the West derives largely from the fact that the relentless pursuit of financial reward and efficiency has led to the development of intensive animal production systems that challenge the conscience of many consumers in those countries In developing countries human survival is still a daily uncertainty so that provision for animal welfare has to be balanced against human welfare Welfare is usually provided for only if it supports the output of the animal be it food work clothing sport or companionship In reality there are resources for all if they are properly husbanded in both developing and developed countries The inequitable division of the world's riches creates physical and psychological poverty for humans and animals alike in all sectors of the world Livestock are the world's biggest land user

FAO 2002 and the population is increasing rapidly to meet the need of an expanding human population Populations of farm animals managed by humans are therefore increasing worldwide and there is the tendency to allocate fewer resources to each animal Increased attention to welfare issues is just as evident for companion laboratory wild and zoo animals
