**Indonesia Business Law Handbook Volume 1 Strategic Information and Basic Laws** IBP USA, 2013-08  
**Indonesia Business Law Handbook Strategic Information and Basic Laws Rural Investment Climate in Indonesia** Neil McCulloch, 2009

This book provides a comprehensive analysis of the constraints facing the development of rural non farm enterprises in Indonesia. Recent years have seen a substantial effort by the Indonesian government to improve the investment climate. To date much of this effort has focused on the constraints faced by businesses at the national level. However if Indonesia is to be successful in creating jobs and reducing poverty across the archipelago this will require improving the investment climate for the 15.7 million micro and small enterprises that employ more than half of all the non farm workers in the country. This book brings together leading Indonesian and international academics to consider seven key constraints that RNFES face: labour regulations and practices, infrastructure, competition and marketing, knowledge transfer and technology, access to credit and financial services, local taxation and user charges, and insecurity. In each case the authors draw on the Indonesian Rural Investment Climate Survey, a unique dataset of more than 2,500 RNFES, to identify the size and nature of the constraints, the way in which they impact upon enterprise growth and the implications for policy. In addition, a key chapter estimates the strength of the linkage between agriculture and non agricultural activities in rural areas, showing that agricultural revitalization is an essential complement to the development of the non farm economy.

Understanding the rural investment climate in both slow and fast growing economies has taken on new urgency in the wake of the world food crisis. The rural non farm economy often provides half or more of the income of farm families and is especially important for food deficit rural households hard hit by rising food prices. The Indonesian Rural Investment Climate Assessment is the gold standard for how to achieve this understanding. It is a delight to see it published and available to a wide audience.

**Sustainable Environmental Management: Lessons from Indonesia** Jatna Supriatna, Ralph Lenz, 2022-10-19 The climate change threat at present has reached a critical stage The development of the world today is threatened as the whole world including Indonesia is facing three crisis namely the economic crisis post COVID 19 Pandemic energy crisis caused by the war in Ukraine and lastly the climate crisis Many world leaders are unaware of the severity of the threat of climate change which has now transformed into a climate crisis The derivative of the climate crisis will not only contribute to worsening of the economic crisis and energy crisis but will quickly shifted into a biodiversity catastrophe drinking water scarcity and the global hunger crisis In turn a political crisis might arose in the form of a denial of the government s authority which was deemed unable to overcome these crises This bleak picture requires a thorough study and solution that is effective but at the same time reaches sustainability and penetrates the future We are blessed to read Prof Jatna and Prof Lenz s Masterpiece Magnus Opus in the form of a book with more than 600 pages that relate to these problems and crises in a series of meanings We should salute them for providing a clear and comprehensive picture of the interrelationships between regions disciplines and elements both in terms of origin and the possibility of solving the problem The presentation is presented comprehensively without letting go of the details and context regarding sustainability and the global picture I am sure that many people especially those in a strong position can benefit and be given references from the essential things presented in this book the great work of both authors which I am proud of Prof Rachmat Witoelar Indonesia s President s Special Envoy for Climate Change 2015 2019 and advisor to I SER UI and CAIPSDCC The concept of sustainable development is a development concept that ensures the fulfillment of the human needs of the present generation without compromising the ability of future generations to meet their needs That is the idea of sustainable development emphasizes the development of technologies that can increase productivity and reduce the level of damage The concept of sustainable development is an effort to integrate three aspects of life namely social economic and environmental in a synergistic relationship supported by infrastructure and institutions This concept is in line with the avoidance of shell game theory where shell game theory solves the problem by creating another problem The book written by Prof Jatna Supriatna and his colleague Prof Ralph Lenz from the United States on environmentally sustainable development in Indonesia is very well written It suits students environmental experts planning bureaucrats and legislature members Plus those who are doing development planning both at home and abroad Each environmental problem is described in detail and clarity and the solution options are given so that sound environmental management can be sustainable Prof Satryo Brodjonegoro President of Indonesian Academy of Sciences Indonesia is an archipelago country that harbors natural

resources It is among the countries with the most complete and extensive natural resource base perhaps trailing only Brazil Still using natural resources as input for current production processes has increased yearly depletion With its abundant natural resources Indonesia should have become a prosperous country from an economic perspective But yearly rising levels of natural resource depletion in many regions of the country have occurred without an increase in equitable human welfare those words that I picked up from Prof Jatna Supriatna and his friend s book I support this book s aim that environmental sustainability is necessary for Indonesia This book should be read not only by students Environment NGOs and lecturers but also decision makers Dede Djuhana Ph D Dean of Faculty of Mathematics and Natural Sciences Universitas Indonesia
