edge of a humid subtropical climate that extends west to the middle of Texas and north along the coast to New Jersey He has created permaculture patterns ranging from raising transplants and field design to freshwater prawn production and composting These patterns have simplified the operation of the 125 share CSA farm while reducing reliance on outside resources In less time than it takes to mow his two acre homestead Jadrnicek is building a you pick fruit farm using permaculture patterns His landscape requires only the labor of harvesting and the only outside input he buys is a small amount of chicken feed By carefully engaging the free forces of nature water wind sunlight convection gravity and decomposition Jadrnicek creates sustenance without maintenance and transforms waste into valuable farm resources The Bio Integrated Farm offers in depth information about designing and building a wide range of bio integrated projects including reflecting ponds water storage ponds multipurpose basins greenhouses compost heat extraction pastured chicken systems aquaculture hydroponics hydronic heating water filtration and aeration cover cropping and innovative rainwater harvesting systems that supply water for drip irrigation and flushing toilets
