for Orchestration Execution Andreas Schönberger, 2012 The establishment and implementation of cross organizational business processes is an implication of today s market pressure for efficiency gains In this context Business To Business integration B2Bi focuses on the information integration aspects of business processes A core task of B2Bi is providing adequate models that capture the message exchanges between integration partners Following the terminology used in the SOA domain such models will be called choreographies in the context of this work Despite the enormous economic importance of B2Bi existing choreography languages fall short of fulfilling all relevant requirements of B2Bi scenarios Dedicated B2Bi choreography standards allow for inconsistent outcomes of basic interactions and do not provide unambiguous semantics for advanced interaction models In contrast to this more formal or technical choreography languages may provide unambiguous modeling semantics but do not offer B2Bi domain concepts or an adequate level of abstraction Defining valid and complete B2Bi choreography models becomes a challenging task in the face of these shortcomings At the same time invalid or underspecified choreography definitions are particularly costly considering the organizational setting of B2Bi scenarios Models are not only needed to bridge the typical gap between business and IT but also as negotiation means

among the business users of the integration partners on the one hand and among the IT experts of the integration partners on the other. Misunderstandings between any two negotiation partners potentially affect the agreements between all other negotiation partners.

Information and Communications Security Tatsuaki Okamoto, Jianying Zhou, 2001-10-24 ICICS 2001 the Third International Conference on Information and Communications Security was held in Xi'an, China, 13-16 November 2001. Among the preceding conferences ICICS 97 was held in Beijing, China, 11-14 November 1997 and ICICS 99 in Sydney, Australia, 9-11 November 1999. The ICICS 97 and ICICS 99 proceedings were released as volumes 1334 and 1726 of Springer Verlag's Lecture Notes in Computer Science series. ICICS 2001 was sponsored by the Chinese Academy of Sciences, CAS, the National Natural Science Foundation of China and the China Computer Federation. The conference was organized by the Engineering Research Center for Information Security Technology of the Chinese Academy of Sciences, ERCIST, CAS, in cooperation with the International Association for Cryptologic Research, IACR, the International Communications and Information Security Association, ICISA, and the Asiacrypt Steering Committee. The format of ICICS 2001 was selected to cover the complete spectrum of information and communications security and to promote participant interaction. The sessions were designed to promote interaction between the major topics of the conference: theoretical foundations of security, secret sharing, network security, authentication and identification, boolean functions and stream ciphers, security evaluation, signatures, block ciphers and public key systems, information hiding protocols and their analysis and cryptanalysis. The 29 member Program Committee considered 134 submissions from 23 different countries and regions; among them 56 papers were accepted for presentation.

In the Frontiers of Computational Science George Maroulis, Theodore Simos, 2005-10-28 This volume contains a collection of the lectures of the invited speakers and symposium organizers presented at the International Conference of Computational Methods in Science and Engineering, ICCMSE 2005, held in Corinth, Greece, October 2005. The content of the papers bears upon new developments of Computational Science pertinent to Physics, Chemistry, Biology, Medicine, Mathematics and Engineering. Molecular Science is a privileged ground for the application and evaluation of new mathematical tools and computational methods. In recent years, novelty and progress with greatest conceivable speed is common experience. This flavor of research findings, carrying many consequences for distant fields, is easily evidenced in the lectures collected in this volume.
