Stocktakings From An Apprenticeship:

Stocktakings from an Apprenticeship Pierre Boulez, 1991 **The Cambridge Companion to Serialism** Martin Iddon, 2023-02-16 What is serialism Defended by enthusiastic champions and decried by horrified detractors serialism was central to twentieth century art music but riven too by inherent contradictions The term can be a synonym for dodecaphony Arnold Schoenberg's method of composing with twelve tones which are related only to one another It can be more expansive describing ways of composing systematically with parameters beyond pitch duration dynamic and more and can even stand as a sort of antonym to dodecaphony Schoenberg is Dead as Pierre Boulez once insisted Stretched to its limits it can describe approaches where sound can be divided into discrete parameters and later recombined to generate the new the unexpected beginning to blur into a further antonym post serialism This Companion introduces and embraces serialism in all its dimensions and contradictions from Schoenberg and Stravinsky to Stockhausen and Babbitt and explores its variants and legacies in Europe the Americas and Asia Gérard Grisey and Spectral Music Liam Cagney, 2023-11-29 The first in depth historical overview of spectral music which is widely regarded alongside minimalism as one of the two most influential compositional movements of the last fifty years Charting spectral music's development in France from 1972 to 1982 this ground breaking study establishes how spectral music's innovations combined existing techniques from post war music with the use of information technology The first section focuses on Gérard Grisey showing how he creatively developed techniques from Messiaen Xenakis Ligeti Stockhausen and Boulez towards a distinctive style of music based on groups of sounds mutating in time The second section shows how a wider generation of young composers centred on the Parisian collective L'itinéraire developed a common vision of music embracing seismic developments in psychoacoustics and computer sound synthesis Framed against institutional and political developments in France spectral music is shown as at once an inventive artistic response to the information age and a continuation of the French colouristic tradition **Electronic Inspirations** Jennifer Iverson, 2018-11-28 For a decimated post war West Germany the electronic music studio at the WDR radio in Cologne was a beacon of hope Collaborating with scientists and technicians the studio's composers coaxed music from oscillators generators filters and magnetic tape reclaiming and repurposing military machines spaces and discourses into the new sounds of mid century electronic music Jennifer Iverson's *Electronic Inspirations* Technologies of the Cold War Musical Avant Garde traces the development of this music into a quintessential Cold War innovation one that reverberated as much with anxiety as with the promise of a new age **Twentieth-century Music Theory and Practice** Edward Pearsall, 2012 *Twentieth Century Music Theory and Practice* introduces a number of tools for analyzing a wide range of twentieth century musical styles and genres It includes discussions of harmony scales rhythm contour post tonal music set theory the twelve tone method and modernism Recent developments involving atonal voice leading K sets nonlinearity and neo Riemannian transformations are also engaged While many of the theoretical tools for analyzing twentieth century music have been

devised to analyze atonal music they may also provide insight into a much broader array of styles This text capitalizes on this idea by using the theoretical devices associated with atonality to explore music inclusive of a large number of schools and contains examples by such stylistically diverse composers as Paul Hindemith George Crumb Ellen Taffe Zwilich Steve Reich Michael Torke Philip Glass Alexander Scriabin Ernest Bloch Igor Stravinsky Bela Bartok Sergei Prokofiev Arnold Schoenberg Claude Debussy György Ligeti and Leonard Bernstein This textbook also provides a number of analytical compositional and written exercises The aural skills supplement and online aural skills trainer on the companion website allow students to use theoretical concepts as the foundation for analytical listening Access additional resources and online material here <http://www.twentiethcenturymusictheoryandpractice.net> and <https://www.motivichearing.com>

The Work of Literary Translation Clive Scott, 2018-06-07 Offering an original reconceptualization of literary translation Clive Scott argues against traditional approaches to the theory and practice of translation. Instead he suggests that translation should attend more to the phenomenology of reading triggering creative textual thinking in the responsive reader rather than testing the hermeneutic skills of the professional translator. In this new guise translation enlists the reader as an active participant in the constant re-fashioning of the text's structural associative intertextual and intersensory possibilities so that our larger understanding of ecology anthropology comparative literature and aesthetics is fundamentally

transformed and our sense of the expressive resources of language radically extended Literary translation thus assumes an existential value which takes us beyond the text itself to how it situates us in the world and what part it plays in the geography of human relationships
